Jazz Songs (4 Tunes) Martin Stolz, 2016-08-10 These 4 songs are included in my book Jazz Studies Your Way into Jazz available as eBook and iOS App Saxophones English Informations at www.martinstolz.de The song s level of difficulty complies to advanced students already having knowledge of the basics of Jazz like phrasing and rhythm The 4 Jazz tunes contain the most common song forms in Jazz Blues diatonic chords like e g in Autumn Leaves Rhythm Changes and a Ballad Misty Beside the melody there as well is a transcribed solo for each tune listening example For every song there is a video playing the melody and the solo listening example a leadsheet with playalong here you can play along to the music either play the solo I play or play your own one and a sheet with the whole song for printing out or just playing Here are some tips for working with this book Try to transcribe the soli by your own at first then use the transcriptions to control your work Keep in mind Music is a matter of ears primarily not of the eyes The more you try to learn songs or solos by hearing them the faster you will be able to play things you hear on your instrument Especially in Jazz it is important to react on things you hear immediately Analyze the soli and transpose single phrases to all keys Then try to integrate them in your own playing Play to the recording synchronously and try to imitate my playing as well as possible You will note that I am more of a laid back player I consciously have not played school book like since in Jazz the personal way of phrasing and timing is all that

counts of course one should be able to play right in time if needed Keep in mind even a child tries to copy the adults to learn that doesn't mean that the child won't find his own way You cannot copy one by 100% In fact though copying others we find our own way that at least is my personal experience Pay attention to the way I phrase each single note the notes written are only the basis The aim is to sense every single note and phrase it Therefore it is very useful to work with a software allowing you to slow down the music as well as looping single parts e.g. Anytune or Transcribe You will recognize that the slower the music the better you can hear the phrasing and this way you can try to copy it more easily Play your own soli and record them Then transcribe and analyze them This way you will learn a lot about your playing Pay attention to the following points

- 1 rhythmic manner of your phrases start length ending variety
- 2 choice of tones wrong inconvenient tones variety
- 3 Dramaturgy of the soli how is the structure relaxation tension
