Sears,2014-09-22 A veteran writer presents his personal account of being in the trenches of the television industry offering advice and tactics for aspiring scriptwriters Steven L Sears has had a successful career in film and television encompassing over thirty years of involvement at all levels From his beginnings as a staff writer on the hit NBC show The A Team to Co Executive Producer on the hit series Xena Warrior Princess for MCA Universal creator and Executive Producer of Sheena for Sony TriStar Television and many pilot and development deals with the major studios and production companies he has amassed a huge amount of experience and knowledge about the inner workings of the entertainment industry In The Non User Friendly Guide for Aspiring Television Writers he shares that experience and gives advice for those considering a career in television writing Instead of the traditional academic and sterile approach Steven answers questions from a personal first person perspective The questions have been culled from the real world people seeking out his advice and looking for the experience that most books don t have Some of what he writes about are hard and difficult facts to accept about the business Other times it s his opinion based on his vast experience But all of it is unsweetened and direct Even if you don t like his answers he will certainly make you think hard about your approach and choices when pursuing a career in an extremely difficult industry As a result you will be better prepared to achieve the success that he has had Accessible personable and relaxed It s like having lunch with Steven and asking him questions about the business Without having to watch him eat **Handbook of Media Economics** Simon P. Anderson,Joel Waldfogel,David Stromberg,2015-11-17 Handbook of Media Economics provides valuable information on a unique field that has its own theories evidence and policies Understanding the media is important for society and while new technologies are altering the media they are also affecting our understanding of their economics Chapters span the large scope of media economics simultaneously offering in depth analysis of particular topics including the economics of why media are important how media work including financing sources institutional settings and regulation what determines media content including media bias and the effects of new technologies The volumes provide a powerful introduction for those interested in starting research in media economics Helps academic and non academic economists understand recent rapid changes in theoretical and empirical advances in structural empirical methods and in the media industry s connection with the democratic process Presents the only detailed summary of media economics that emphasizes political economy merger policy and competition policy Pays special attention to the economic influences of the Internet including developments in social media user generated content and advertising as well as the Internet s effects on newspapers radio and television From Betamax to Blockbuster Joshua M. Greenberg,2010-09-24 How the VCR was transformed from a machine that records television into a medium for movies The first video cassette recorders were promoted in the 1970s as

an extension of broadcast television technology a time shifting device a way to tape TV shows Early advertising for Sony's Betamax told potential purchasers You don't have to miss Kojak because you're watching Columbo But within a few years the VCR had been transformed from a machine that recorded television into an extension of the movie theater into the home This was less a physical transformation than a change in perception but one that relied on the very tangible construction of a network of social institutions to support this new marketplace for movies In *From Betamax to Blockbuster* Joshua Greenberg explains how the combination of neighborhood video stores and the VCR created a world in which movies became tangible consumer goods Greenberg charts a trajectory from early videophile communities to the rise of the video store complete with theater marquee lights movie posters popcorn and clerks who offered expert advice on which movies to rent The result was more than a new industry by placing movies on cassette in the hands and control of consumers video rental and sale led to a renegotiation of the boundary between medium and message and ultimately a new relationship between audiences and movies Eventually Blockbuster's top-down franchise store model crowded local video stores out of the market but the recent rise of Netflix iTunes and other technologies have reopened old questions about what a movie is and how and where it ought to be watched By focusing on the spaces in between manufacturers and consumers Greenberg's account offers a fresh perspective on consumer technology illustrating how the initial transformation of movies from experience into commodity began not from the top down or the bottom up but from the middle of the burgeoning industry out
