Quality Assurance on Land and Offshore Piling J. Beim, S. Niyama, 2000-01-01 This work collates the topics discussed in the sixth International Conference on land and offshore piling It covers topics such as wave mechanics and its application to pile mechanics driving equipment and developments and pile integrity and low strain dynamic testing Application of Stress-wave Theory to Piles Frans B. J. Barends, 2022-06-03 Comprising 97 papers on Geotechnical Dynamic testing Equipment Performance during installation Driving equipment hammer pile soil system Reliability of predictions Theory versus experiment and simulation Each part starts with a lecture by invited keynote speakers followed by a general report on the papers New themes considered are environmental aspects related to vibration and noise the reliability of predictions emphasizing the validation of theoretical methods practical experience **Hypersonic Technology for Military**

robotics in non industrial environments In order to anticipate a wider deployment of intelligent and autonomous robots for tasks such as manufacturing healthcare entertainment search and rescue surveillance exploration and security missions it is essential to push the frontier of robotics into a new dimension one in which motion and intelligence play equally important roles The 2010 International Conference on Intelligent Robotics and Applications ICIRA 2010 was held in Shanghai China November 10 12 2010 The theme of the conference was Robotics Harmonizing Life a theme that reflects the ever growing interest in research development and applications in the dynamic and exciting areas of intelligent robotics These volumes of Springer s Lecture Notes in Artificial Intelligence and Lecture Notes in Computer Science contain 140 high quality papers which were selected at least for the papers in general sessions with a 62% acceptance rate Traditionally ICIRA 2010 holds a series of plenary talks and we were fortunate to have two such keynote speakers who shared their expertise with us in diverse topic areas spanning the range of intelligent robotics and application activities [Energy Research Abstracts](#) ,1993
