**What It Means to be Human** Joanna Bourke, 2013-07-23 In 1872 a woman known only as An Earnest Englishwoman published a letter titled Are Women Animals in which she protested against the fact that women were not treated as fully human In fact their status was worse than that of animals regulations prohibiting cruelty against dogs horses and cattle were significantly more punitive than laws against cruelty to women The Earnest Englishwoman's heartfelt cry was for women to become animal in order to gain the status that they were denied on the grounds that they were not part of mankind In this fascinating account Joanna Bourke addresses the profound question of what it means to be human rather than animal How are people excluded from political personhood How does one become entitled to rights The distinction between the two concepts is a blurred line permanently under construction If the Earnest Englishwoman had been capable of looking 100 years into the future she might have wondered about the human status of chimeras or the ethics of stem cell research Political disclosures and scientific advances have been re locating the human animal border at an alarming speed In this meticulously researched illuminating book Bourke explores the legacy of more than two centuries and looks forward into what the future might hold for humans women and animals

*Human in the Digital Economy* Nicholas Agar, 2019-03-12 An argument in favor of finding a place for humans and humanness in the future digital economy In the digital economy accountants baristas and cashiers can be automated out of employment so can surgeons airline pilots and cab drivers Machines will be able to do these jobs more efficiently accurately and inexpensively But Nicholas Agar warns in this provocative book these developments could result in a radically disempowered humanity The digital revolution has brought us new gadgets and new things to do with them The digital revolution also brings the digital economy with machines capable of doing humans jobs Agar explains that developments in artificial intelligence enable computers to take over not just routine tasks but also the kind of mind work that previously relied on human intellect and that this threatens human agency The solution Agar argues is a hybrid social digital economy The key value of the digital economy is efficiency The key value of the social economy is humanness A social economy would be centered on connections between human minds We should reject some digital automation because machines will always be poor substitutes for humans in roles that involve direct contact with other humans A machine can count out pills and pour out coffee but we want our nurses and baristas to have minds like ours In a hybrid social digital economy people do the jobs for which feelings matter and machines take on data intensive work But humans will have to insist on their relevance in a digital age

On Blackness, Liveliness, and What It Means to Be Human Wilson Kwamogi Okello, 2024-10-01 In No Humans Involved An Open Letter to My Colleagues Jamaican writer and theorist Sylvia Wynter critiques the social and human sciences for perpetuating social hierarchies particularly through the Western humanist framing of Man as the universal representation of humanity Human development theories revolve around this concept necessitating acquiescence to the category Man to claim humanity

But Blackness complicates and unsettles these terms in ways the fields of higher education and educational research are in many ways just beginning to confront On Blackness Liveliness and What It Means to Be Human extends Wynter's critique to human development and academic knowledge production arguing that Black specificity can create new possibilities for Black being Wilson Kwamogi Okello closely examines holistic development theory aiming not to reform but to reimagine the self it presupposes Taking what he describes as a multimodal and multisensory approach Okello engages a chorus of writers thinkers and cultural workers Baldwin Bambara Brand Hartman Lorde Sharpe Spillers Wilderson and more to reframe Blackness as a social political and historical matrix going beyond the study of Black experiences biology or culture Punctuated throughout by stunning images from artist Mikael Owunna's Infinite Essence series the book proposes and enacts a methodological attunement to Blackness that can guide theory policy and practice toward an alternative praxis for the benefit of Black living

**The Philosophy of Maria Montessori: What It Means to Be Human** Robert Buckenmeyer Ph.D., 2009-08-28 Dr Maria Montessori opened the first Casa dei Bambini Childrens House on 6 January 1907 in San Lorenzo Rome Through her observations and work with these children she discovered their astonishing almost effortless ability to learn Thus began a century of great work uncovering the true nature of childhood Times have changed and science has made great progress and so has our work but our principles have only been confirmed and along with them our conviction that mankind can hope for a solution to its problems among which the most urgent are those of peace and unity only by turning its attention and energies to the discovery of the child and to the development of the great potentialities of the human personality in the course of its formation Dr Montessori from the forward to The Discovery of the Child Poona 1948 What Does It Mean To Be Human? Bryan Gould, 2022-11-30 In the absence of divine direction how do we decide for ourselves the behaviours that would best serve our own interests and those of other creatures and of the planet as a whole What might we turn to and draw upon to help us in making our own rules and in establishing our own moral principles What Does it Mean to be Human? Life, Death, Personhood and the Transhumanist Movement D. John Doyle, 2018-09-01 This book is a critical examination of the philosophical and moral issues in relation to human enhancement and the various related medical developments that are now rapidly moving from the laboratory into the clinical realm In the book the author critically examines technologies such as genetic engineering neural implants pharmacologic enhancement and cryonic suspension from transhumanist and bioconservative positions focusing primarily on moral issues and what it means to be a human in a setting where technological interventions sometimes impact strongly on our humanity The author also introduces the notion that death is a process rather than an event as well as identifies philosophical and clinical limitations in the contemporary determination of brain death as a precursor to organ procurement for transplantation The discussion on what exactly it means to be dead is later applied to explore philosophical and clinical issues germane to the cryonics movement Written by a physician scientist and heavily referenced to the peer reviewed medical and scientific literature the book is aimed at

advanced students and academics but should be readable by any intelligent reader willing to carry out some side reading No prior knowledge of moral philosophy is assumed as the various key approaches to moral philosophy are outlined early in the book
