## **Time Evaluation With Clock Times:**

SAP HR TIME MANAGEMENT P. K. AGRAWAL, 2010-08-17 This book explains all the concepts underpinning SAP's HR Time Management Module. It is a comprehensive technical manual which explains every single node of the User Menu and the Configuration. The book first gives an overview of a concept explaining what it is, how it is used, and how it relates to the other concepts. It then explains its properties which are fields in a configuration node. This book is designed to be used both as a reference manual and a learning guide. As a learning guide, it offers four views each for a different target audience. It can be read from the Senior Management's perspective to gain a broad understanding of the subject and what SAP can do for them. Business Process Owners can achieve a higher level of understanding by getting to know more of SAP concepts and how to perform different tasks in SAP. Users can acquire a thorough understanding of different tasks and concepts underlying them. Functional consultants and proficient users can read the book to gain a complete understanding of the system. As a technical reference, the book can be used to locate the relevant material through the Table of Contents, Index, SAP Menu, and SAP Customizing Implementation Guide (IMG). The last two follow the Table of Contents. If the reader is in SAP's User Menu or Configuration, the chapter number for these nodes can be found in SAP Menu and IMG. If a node is not covered in the book, the reason for not doing so is mentioned. The implementation of SAP HR Time Management and documentation can also be guided by the structure of this book.

SAP is a great software. One needs to fully understand its features in order to effectively exploit them for the benefit of customers. Mr. Agrawal's books on SAP HR have a unique approach. A chapter usually focuses on a single business concept and discusses the user interface as well as its associated configuration. This logical division makes it easier for readers to understand the functionality. Another important feature of these books is the level of detail. Each screen and each field in a screen is explained. Explanation includes meaning, use case, and in some cases, guidelines. Details are balanced by overviews explaining the concepts and their relationships. While explaining functionality, Mr. Agrawal has taken efforts to highlight what can be done and how it is to be done. This is particularly important for less experienced users and consultants. Indicating chapter numbers against each menu and configuration item is a very useful innovation as it establishes a direct link between the SAP system and the book. Another useful feature is that these books can be read not only by consultants but also by users, business process owners, and even by senior managers. The importance of each topic for each category of users is specified. Mr. Agrawal has taken considerable pain in writing these books, and I congratulate Mr. Agrawal on his achievement and thank him for his contribution to the SAP community.

**Computer Chess Compendium** D. LEVY,2013-06-29 For many years I have been interested in computer chess and have collected almost every learned paper and article on the subject that I could find. My files are now quite large and a considerable amount of time, effort, and expense has been required to build up this collection. I have often

thought how difficult it must be for many computer chess enthusiasts to acquire copies of articles that they see referenced in some other work Unless one has access to a good reference library the task is almost impossible I therefore decided to try to make available in one volume as many as possible of the most interesting and important articles and papers ever written on the subject Such a selection is naturally somewhat subjective and I hope that I will not offend authors whose works have been excluded In particular I have decided to exclude any material which has appeared in the Journal of the International Computer Chess Association ICCA or in its precursor the ICCA Newsletter The reason is simply that the ICCA itself is in the process of compiling a compendium containing the most important material published in those sources For further information on ICCA membership and publications the reader is invited to contact Professor H 1 van den Herik or Dr Jonathan Schaeffer University of Limburg Computing Science Department of Computer Science University of Alberta 6200 MD Maastricht Edmonton Netherlands Alberta Canada T6G 2H1
