From the Paris Agreement to a Low-Carbon Bretton Woods Michele Stua,2017-03-02 This book investigates the existing and possible links between the concept of a Carbon Club and the Paris Agreement In doing so the book defines those criteria that may lead to an effective

establishment of a Carbon Club acting within the mandate of the Paris Agreement and identifies the key questions that such an option may help to tackle Which low carbon pathways are compatible with the new temperature targets set by the Paris Agreement Can new entities like the Carbon Club have a decisive role in guaranteeing the alignment of the aggregate mitigating actions with the global objectives identified within the Paris Agreement What role will be played by market and non market approaches within the proposed framework How can economic social and environmental sustainability be ensured during the implementation of the Agreement How can justice and equity be encouraged between the Parties and all the involved actors as required by the Agreement Which instruments can be designed and adopted to provide the expected degree of transparency for the new system To respond to these questions the book adopts a holistic approach able to emphasize the strong interrelations The book discusses the opportunity to develop a Carbon Club within the Article 6 framework and provides a feasible roadmap for its means of implementation rules and governance structure The final result is a feasible policy proposal that takes into account all the key issues introduced by the questions and draws a roadmap towards a low carbon Bretton Woods

Hybrid Solutions for the Modelling of Complex Environmental Systems Christian E. Vincenot, Stefano Mazzoleni, Lael Parrott, 2017-01-11 Systems studied in environmental science due to their structure and the heterogeneity of the entities composing them often exhibit complex dynamics that can only be captured by hybrid modeling approaches While several concurrent definitions of hybrid modeling can be found in the literature it is defined here broadly as the approach consisting in coupling existing modelling paradigms to achieve a more accurate or efficient representation of systems The need for hybrid models generally arises from the necessity to overcome the limitation of a single modeling technique in terms of structural flexibility capabilities or computational efficiency This book brings together experts in the field of hybrid modelling to demonstrate how this approach can address the challenge of representing the complexity of natural systems Chapters cover applied examples as well as modeling methodology
