Time Warner Basic Cable Tv Guide:

TV Guide ,2006 *FCC Record* United States. Federal Communications Commission,2008 **Consuming Environments** Mike Budd,Steve Craig,Clayton M. Steinman,1999 This is an exploration of how much TV people watch why they watch too much and what they see The authors argue that while people may have good reasons for watching television they seem to be unaware that such habits might be harmful to their environmental health The book examines how advertising and media companies have shaped the commercial content of most television tracing industry motives and operations and their increasing concentration in fewer hands **Television & Cable Factbook** ,2006 **Global Media Giants** Benjamin Birkinbine,Rodrigo Gomez,Janet Wasko,2016-07-01 Global Media Giants takes an in depth look at how media corporate power works globally regionally and nationally investigating the ways in which the largest and most powerful media corporations in the world wield power Case studies examine not only some of the largest media corporations News Corp The Microsoft Corporation in terms of revenues but also media corporations that hold considerable power within national regional or geolinguistic contexts Televisa The Bertelsmann Group Sony Corporation Each chapter approaches a different corporation through the lens of economy politics and culture giving students and scholars a thoughtful and data driven guide with which to interrogate contemporary media industry power **Focus On: 100 Most Popular Television Series by Warner Bros. Television** Wikipedia contributors, [Understanding the Global Experience](#) Thomas Arcaro,Rosemary Haskell,Chinedu Eke,Robert Anderson,Stephen Braye,Ann Cahill,Brian Digre,Anne Bolin,Mathew Gendle,Duane McClearn,Jeffrey Pugh,Laura Roselle,Jean Schwind,Kerstin Sorensen,Anthony Weston,2016-03-22 First Published in 2016 In this anthology of essays for Global Studies students the editors hope to encourage readers to live intelligent and thoughtful lives not only as citizens of their native countries but also as citizens of the world **Hoover's Handbook of American Business 2005** Hoover's, Incorporated,Hoovers Inc,2004-12 Profiles of 750 major U S companies *Free Culture* Lawrence Lessig,2004 From the most important thinker on intellectual property in the Internet era The New Yorker a landmark manifesto about the genuine closing of the American mind Lawrence Lessig could be called a cultural environmentalist One of America s most original and influential public intellectuals his focus is the social dimension of creativity how creative work builds on the past and how society encourages or inhibits that building with laws and technologies In his two previous books Code and The Future of Ideas Lessig concentrated on the destruction of much of the original promise of the Internet Now in Free Culture he widens his focus to consider the diminishment of the larger public domain of ideas In this powerful wake up call he shows how short sighted interests blind to the long term damage they re inflicting are poisoning the ecosystem that fosters innovation All creative works books movies records software and so on are a compromise between what can be imagined and what is possible technologically and legally For more than two hundred years laws in America have sought a balance between rewarding creativity and allowing the borrowing from which new creativity springs The original term of

copyright set by the Constitution in 1787 was seventeen years. Now it is closer to two hundred. Thomas Jefferson considered protecting the public against overly long monopolies on creative works an essential government role. What did he know that we've forgotten? Lawrence Lessig shows us that while new technologies always lead to new laws, never before have the big cultural monopolists used the fear created by new technologies, specifically the Internet, to shrink the public domain of ideas, even as the same corporations use the same technologies to control more and more what we can and can't do with culture. As more and more culture becomes digitized, more and more becomes controllable, even as laws are being toughened at the behest of the big media groups. What's at stake is our freedom: freedom to create, freedom to build, and ultimately freedom to imagine.

Converging Media, Diverging Politics Mike Gasher, 2005-01-01. What purpose does the news media serve in contemporary North American society? In this collection of essays, experts from both the United States and Canada investigate this question, exploring the effects of media concentration in democratic systems. Specifically, the scholars collected here consider from a range of vantage points how corporate and technological convergence in the news industry in the United States and Canada impacts journalism's expressed role as a medium of democratic communication. More generally, and by necessity, *Converging Media, Diverging Politics* speaks to larger questions about the role that the production and circulation of news and information does, can, and should serve. The editors have gathered an impressive array of critical essays featuring interesting and well-documented case studies that will prove useful to both students and researchers of communications and media studies.

Popular Mechanics, 2005-04. *Popular Mechanics* inspires, instructs, and influences readers to help them master the modern world. Whether it's practical DIY home improvement tips, gadgets, and digital technology information on the newest cars or the latest breakthroughs in science, *PM* is the ultimate guide to our high-tech lifestyle.

Commercial Culture Leo Bogart, 2017-09-29. American mass media are the world's most diverse, rich, and free. Their dazzling resources, variety, and influence arouse envy in other countries. Their failures are commonly excused on the grounds that they are creatures of the market that they give people what they want. *Commercial Culture* focuses not on the glories of the media but on what is wrong with them and why, and how they may be made better. This powerful critique of American mass communication highlights four trends that sound an urgent call for reform: the blurring of distinctions among traditional media and between individual and mass communication; the increasing concentration of media control in a disturbingly small number of powerful organizations; the shift from advertisers to consumers as the source of media revenues; and the growing confusion of information and entertainment of the real and the imaginary. The future direction of the media, Leo Bogart contends, should not be left to market forces alone. He shows how the public's appetite for media differs from other demands the market is left to satisfy because of how profoundly the media shape the public's character and values. Bogart concludes that a world of new communications technology requires a coherent national media policy, respectful of the American tradition of free expression and subject to vigorous public scrutiny and debate. *Commercial Culture* is a comprehensive

analysis of the media as they evolve in a technological age It will appeal to general readers interested in mass communications as well as professionals and scholars studying American mass media **New York Magazine** ,1993-05-17 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **Watching TV** Harry Castleman,Walter J.
