Times Guide To Good Universities:

Managing Successful Universities Shattock, Michael, 2010-09-01 Professor Mark Taylor Dean Warwick Business School University of Warwick *The New York Times Guide to Essential Knowledge, Second Edition* The New York Times, 2007-10-30 Introducing a comprehensive update and complete revision of the authoritative reference work from the award winning daily paper this one volume reference book informs educates and clarifies answers to hundreds of topics

University Rankings Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties Global

University Rankings T. Erkkilä, 2013-09-26 Global University Rankings explores the novel topic of global university rankings and their effects on higher education in Europe The contributions in this volume outline different discourses on global university rankings and explore the related changes concerning European higher education policies disciplinary traditions and higher education institutions The first global university rankings were published less than a decade ago but these policy instruments have become highly influential in shaping the approaches and institutional realities of higher education The rankings have portrayed European academic institutions in a varying light There is intense reflexivity over the figures leading to ideational changes and institutional adaptation that take surprisingly similar forms in different European countries The contributions in this book critically assess global university rankings as a policy discourse that would seem to be instrumental to higher education reform throughout Europe **University Rankings, Diversity, and the New Landscape of Higher Education** , 2019-02-18 University rankings are a relatively new phenomenon in higher education Although quite an established practice in the U S it is only within the last decade that attempts to analyse university performance have spread to the rest of the world and that we also have seen new global rankings appear rankings attempting to measure university performance beyond national borders No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world This book is written as part of the effort to better understand rankings and their effects on higher education A serious approach towards university rankings implies that rankings should be analysed properly including the methods used and the indicators chosen and investigate the objectives claimed If university rankings are considered as

consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education Consequently the contributions to this book investigate and analyse how different rankings work how they reach their conclusions and on what data and methodology they are built Furthermore it provides a critical reflection about the impact of rankings on higher education how and in what way rankings influence policy making the structure of the sector or the internal life of the sector

Against Creative Writing Andrew Cowan,2022-09-13 The rise of Creative Writing has been accompanied from the start by two questions can it be taught and should it be taught This scepticism is sometimes shared even by those who teach it who often find themselves split between two contradictory identities the artistic and the academic Against Creative Writing explores the difference between writing which is what writers do and Creative Writing which is the instrumentalisation of what writers do Beginning with the question of whether writing can or ought to be taught it looks in turn at the justifications for BA MA and PhD courses and concludes with the divided role of the writer who teaches It argues in favour of Creative Writing as a form of hands on literary education at undergraduate level and a form of literary apprenticeship at graduate level especially in widening access to new voices It argues against those forms of Creative Writing that lose sight of literary values as seen in the proliferation of curricular couplings with non literary subjects or the increasing emphasis on developing skills for future employment Against Creative Writing written by a writer is addressed to other writers inside or outside the academy at undergraduate or graduate level whether creative or critical

A University Education David Willetts,2017-11-17 Universities have a crucial role in the modern world In England entrance to universities is by nation wide competition which means English universities have an exceptional influence on schools a striking theme of the book This important book first investigates the university as an institution and then tracks the individual on their journey to and through university In A University Education David Willetts presents a compelling case for the ongoing importance of the university both as one of the great institutions of modern society and as a transformational experience for the individual The book also makes illuminating comparisons with higher education in other countries especially the US and Germany Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014 the author offers a powerful account of the value of higher education and the case for more expansion He covers controversial issues in which he was involved from access for disadvantaged students to the introduction of 9 000 fees The final section addresses some of the big questions for the future such as the the relationship between universities and

business especially in promoting innovation He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework **University Rankings** William Yat Wai Lo, 2014-02-17 This book adopts a qualitative case study approach to provide the readers with a systematic delineation and interpretation of the implications of the university ranking phenomenon for Taiwan's higher education system It reviews the literature on different theories concerning the global transformation of higher education and presents basic information on higher education in Taiwan The author develops a four dimensional framework for the analysis of the ranking phenomenon in the island state First the technological ecological dimension aims to look into how the rankings have impacted Taiwan's higher education based on empirical findings from five Taiwanese public universities Next the technological geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education The two conceptual dimensions focus on the relationship between the rankings and power in higher education They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives From an ecological perspective the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy Geographically while the empirical analysis is based on data from Taiwan the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia **The Great Brain Race** Ben Wildavsky, 2012-08-26 Reveals how international competition for university students is impacting higher education and explains the benefits of this competition which allows students to choose from diverse educational settings and programs **Sheffield , Social Class on Campus** Will Barratt, 2023-07-03 This is at once a playful text with a serious purpose to provide the reader with the theoretical lenses to analyze the dynamics of social class It will appeal to students and indeed anyone interested in how class mediates relationships in higher education both because of its engaging tone and because it uses the college campus as a microcosm for observing and analyzing the concept of class and does so in a way that will prompt the reader to reflect on her or his location in the continuum of class and understand how every member of the campus community helps co construct social class Will Barratt starts from the premise that there is more than one way to study any idea and that the more tools we use to examine a concept the more fully we understand it in all its complexity and ambiguity To illustrate salient features of class on campus he introduces five fictional European American women Whitney Page Louise Misty Ursula and Eleanor and also includes the real stories of students who represent a diversity of backgrounds Social class is often neglected or ignored as an important issue in the lives of students The book provides the reader with a language for analyzing class with theories of class that go beyond standard economic and sociological models and examples of the manifestation of class all toward the end of helping the reader have more

agency in working with this difficult and challenging concept This book is suitable for students going to college for the first time for courses exploring multicultural issues in contemporary society and for anyone professionally involved with students Each chapter includes a suggested experience and reflection questions to prompt readers to explore their thinking and feeling about class as well as class discussion questions **Rankings and the Reshaping of Higher Education** E. Hazelkorn, 2011-03-08 University rankings have gained popularity around the world and are now a significant factor shaping reputation This book is the first comprehensive study of rankings from a global perspective making an important contribution to our understanding of the rankings phenomenon This book has also been published in Japanese Educational Times, 1887
