Times Higher Good University Guide:

The Global Academic Rankings Game Maria Yudkevich, Philip G. Altbach, Laura E. Rumbley, 2016-03-02 The Global Academic Rankings Game provides a much needed perspective on how countries and universities react to academic rankings Based on a unified case methodology of eleven key countries and academic institutions this comprehensive volume provides expert analysis on this emerging phenomenon at a time when world rankings are becoming increasingly visible and influential on the international stage Each chapter provides an overview of government and national policies as well as an in depth examination of the impact that rankings have played on policy practice and academic life in Australia Chile China Germany Malaysia the Netherlands Poland Russia Turkey the United Kingdom and the United States The Global Academic Rankings Game contributes to the continuing debate about the influence of rankings in higher education and is an invaluable resource for higher education scholars and administrators as they tackle rankings in their own national and institutional contexts

Quality Assurance in Higher Education David Lim, 2020-07-24 This title was first published in 2001 Universities in developing countries have followed their counterparts in developed countries and adopted quality assurance to improve the quality of their activities This text examines the wisdom of such a move when many of the conditions necessary for its success are not present It concludes that quality assurance can be useful in developing countries because it shows how a university's seemingly disparate activities are related to one another to serve a common goal and how the quality of these can best be improved by using an integrated approach Quality assurance also provides more focus and direction to the work of the traditional university system However it must be modified to suit the conditions prevailing in developing countries by being simple in design modest in expectations and realistic in requirements

EBOOK: Managing Successful Universities Michael Shattock, 2010-09-16 There is no truer text to the topic than Managing Successful Universities The second edition is a full revision in which globalisation managing financial disjuncture and the enhancement of research performance all loom larger than before Like its predecessor this book will be used throughout the English speaking world and beyond Professor Simon Marginson Centre for the Study of Higher Education University of Melbourne This is the manual par excellence for modern university leadership and management In my role as a business school dean it is by far the most useful single book I have ever read and continue to read Professor Mark Taylor Dean Warwick Business School University of Warwick When I began my career in university management there was just one book on managing UK universities Now there must be twenty or thirty but none is as comprehensive authoritative readable and important as Shattock's Managing Successful Universities Read this valuable book and learn much from it David Palfreyman Director of OXCHEPS and Bursar New College University of Oxford This bestselling book defines good management in a university context and how it can contribute to university success Extensively updated to reflect political financial and social developments since the first edition it includes a new chapter on the management of teaching and research and gives in

depth coverage to managing retrenchment and the importance of human resource management Drawing on the literature of management in the private sector as well as from higher education and on the experience of the author it emphasizes The holistic characteristics of university management The need to be outward looking and entrepreneurial in management style and The ways successful universities utilize the market to reinforce academic excellence *Consuming Higher Education* Joanna Williams, 2013-01-17 Reflects on the link between constructing students as consumers and the purpose of higher education and the implications for student identity and learning **Admission Matters** Sally P. Springer, Jon Reider, Joyce Vining Morgan, 2017-03-29 Make sense of college admissions and prepare a successful application Admission Matters offers comprehensive expert and practical advice for parents and students to guide them through the college admissions process From building a college list to understanding standardized tests to obtaining financial aid to crafting personal statements to making a final decision this book guides you every step of the way with clear sensible advice and practical tips This new fourth edition has been completely updated to reflect the latest changes in college admissions including new developments in standardized testing applications financial aid and more Questionnaires interactive forms checklists and other tools help you stay focused and organized throughout the process With the answers you need and a down to earth perspective this book provides an invaluable resource for stressed out students and parents everywhere Applying to college can be competitive and complex Admission Matters offers real world expert advice for all students whether you're aiming at an Ivy or the state school close to home It also includes much needed guidance for students with special circumstances including students with disabilities international students and transfer students In addition athletes artists and performers and homeschoolers will find valuable guidance as they plan for and apply to college Understand how the admissions process works and what you can and cannot control Learn how to build a strong list of good fit colleges Craft a strong application package with a compelling personal statement Get expert advice on early admissions financial aid standardized testing and much more Make a final decision that is the right one for you Whether you think you've got applying to college under control or don't even know where to begin Admission Matters is your expert guide throughout the college admissions process *Marketing Higher Education* Maringe, Felix, Gibbs, Paul, 2008-12-01 This book examines marketing from both the market and educational perspectives and offers a view of its value and use within this dialectic relationship In this respect this book is distinctive

Multidimensional Ranking Frans A. van Vught, Frank Ziegele, 2012-02-22 During the last decades ranking has become one of the most controversial issues in higher education and research It is widely recognized now that although some of the current rankings can be severely criticized they seem to be here to stay In addition rankings appear to have a great impact on decision makers at all levels of higher education and research systems worldwide including in universities Rankings reflect a growing international competition among universities for talent and resources at the same time they reinforce competition by their very results Yet major concerns remain as to the rankings methodological underpinnings and to their

various impacts This new book presents a comprehensive overview of the current state of the art of ranking in higher education and research and introduces a completely new approach called multidimensional ranking In part 1 rankings are discussed in the broader context of quality assurance and transparency in higher education and research In addition the many current ranking methodologies are analyzed and critized and their impacts are explored In part 2 a new approach to ranking is introduced based on the basic idea that higher education and research institutions have different profiles and missions and that the performances of these institutions should reflect these differences This multidimensional approach is operationalized in a new multidimensional and user driven ranking tool called U Multirank U Multirank is the outcome of a pilot project sponsored by the European Commission in which the new ranking instrument was designed and tested at a global scale

University Rankings Jung Cheol Shin,Robert K. Toutkoushian,Ulrich Teichler,2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties

Effective Learning and Teaching in Modern Languages James A. Coleman,John Klapper,2005 Written to meet the needs of teachers lecturers and tutors this is the definitive guide to surveying and understanding the key issues best practices and new developments in teaching modern languages

A Companion to New Media Dynamics John Hartley,Jean Burgess,Axel Bruns,2015-06-02 A Companion to New Media Dynamics presents a state of the art collection of multidisciplinary readings that examine the origins evolution and cultural underpinnings of the media of the digital age in terms of dynamic change Presents a state of the art collection of original readings relating to new media in terms of dynamic change Features interdisciplinary contributions encompassing the sciences social sciences humanities and creative arts Addresses a wide range of issues from the ownership and regulation of new media to their form and cultural uses Provides readers with a glimpse of new media dynamics at three levels of scale the macro or system level the meso or institutional level and micro or agency level

A History of Luton Anne Allsopp, 2018-01-19 In the past Luton was a market town and for many years was also a centre for the brewing industry In the 19th century it became famous for hat making and more recently it has grown into a thriving industrial centre During the Second World War it played an important part in the manufacture of army vehicles and children bound for school had to dodge the Churchill tanks on their way to various theatres of conflict Nowadays Luton Airport is the gateway for all types of traveller and the town is well known for its famous football team Luton has always provided visitors with a warm welcome and many have stayed and made the town their home Local industry offered employment opportunities in the early 20th century and many had cause to be grateful for its relative prosperity during the Great Depression Following the Second World War immigrants from the Indian subcontinent and from the West Indies brought with them colourful new cultures that are celebrated in the annual Carnival This fascinating and illustrated account of Luton's past will inform and delight anyone who lives in the town and inspire those who grew up here

The Use of Performance Indicators in Higher Education Martin Cave, 1997 This book surveys the use of performance indicators of teaching of research and of administration and offers suggestions on how they might be developed and used

Learning Marketplace, The: East Meets West In Singapore Prem Kumar, 2015-09-23 In Asia we are witnessing an era where the pendulum of power seems to be swaying towards the East with the rising strength of China and India and Singapore is at the crossroads between these populous nations Although Singapore may appear to be the most westernized country in Asia she is nevertheless a multi-cultural Asian society Having the most open economy in the world Singapore is plugged into the global marketplace of education and learning The development of human capital is used as a strategic economic driver to internationalize and transform education for sustainable competitive advantage Singapore's education system regarded as one of the consistently best performing in the world offers a unique opportunity to explore issues where eastern and western culture values beliefs learning and knowledge systems converge clash and at times diverge This book is meant to extend our knowledge on the role of learning often overlooked and taken for granted as the air that we breathe but which constantly transforms our lives and reshapes societies It is the first book that deals with the dichotomy of east and west going beyond the traditional learning and education framework to other areas such as economic socio-cultural political and technological dimensions that impact Singapore It puts together key topical issues and explores the underbelly of how a small resourceless independent city-state like Singapore stays ahead of the learning curve even while facing increasingly intense global competition where the

discovery and emergence of new systems for empowerment and independence and the resulting creation of new knowledge and modes of communication are challenging traditional boundaries between the virtual and real world *Engaging Student Voices in Higher Education* Simon Lygo-Baker,Ian M. Kinchin,Naomi E. Winstone,2019-07-01 This book examines the importance of exploring the varied and diverse perspectives of student experiences In both academic institutions and everyday discourse the notion of the student voice is an ever present reminder of the importance placed upon the student experience in Higher Education particularly in a context where the financial burden of undertaking a university education continues to grow The editors and contributors explore how notions of the student voice as a single monolithic entity may in fact obscure divergence in the experiences of students Placing so much emphasis on the student voice may lead educators and policy makers to miss important messages communicated or consciously uncommunicated through student actions This book also explores ways of working in partnership with students to develop their own experiences It is sure to be of interest and value to scholars of the student experience and its inherent diversity **Governing Universities Globally** Roger King,2009-01-01 Governing Universities Globally provides a comprehensive account of higher education in the world today and successfully demonstrates how the study of universities now needs to acknowledge to the global environment Andrew Steven Gunn Political Studies Roger King examines how universities as increasingly autonomous organizations are subject to forms of global governance that rely particularly on private and peer processes rather than legal command and compliance The book explores the growing influence of global regulatory governance governmental and private on universities and national higher education systems It considers processes of purposeful standardization normative internalization and markets as solutions for coordination and collective action problems as well as hierarchical command A range of university systems world models and organizations particularly those associated with Europe and the OECD are examined with particular emphasis on the growth of national and global league tables and similar rankings of higher education institutions as a form of regulation Governance globally is found to operate through steerage networks deliberation and communities of the knowledgeable and the expert The comprehensive coverage of global university governance includes conceptual theoretical and empirical analyses that will be invaluable to higher education researchers and students and to public policy academics students and practitioners Global governance analysts global business and management postgraduates as well as regulation theorists and practitioners will also find this book to be of great interest How To Survive Your Doctorate Matthiesen, Jane,Binder, Mario,2009-09-01 The aim of this book is to present student perspectives via case studies on doing a Ph D and thus give potential or current Ph D candidates an insight into real life Most of the literature in the area focuses on academic models of learning and gives clinical advice on how to achieve the content of a Ph D However a doctoral degree requires many additional skills This is a light hearted approach which looks at the everyday interpersonal social and environmental issues associated with doing a PhD from application through to graduation *Surviving the Future* Gail

Munde, Kenneth Marks, 2009-02-28 Every academic library strives to make improvements in its services its effectiveness and its contributions to overall university success Every librarian wants to improve library quality but few are knowledgeable or enthusiastic about the means and mechanisms of quality improvement This book assists librarians to make sense of data collection assessment and comparative evaluation as stepping stones to transformative quality improvement Creating value lies in a library s ability to understand communicate and measure what matters to users and what can be measured can be managed to successful outcomes Complex and fragmented subject matter is synthesized into clear and logical presentation Focuses on current research and best practices International in scope **Rankings and the Reshaping of Higher**

Education Ellen Hazelkorn, 2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation This second edition updates Ellen Hazelkorn s first comprehensive study of rankings from a global perspective drawing in new original research and extensive analysis It is essential reading for policymakers managers and scholars *Successful Personal Statements to Get You into a Top University* Warren Zhang, Hemant Mohapatra, 2014-02-20 This book will help aspiring undergraduates through the competitive admissions process for some of the world s top universities It will help prospective candidates answer a very specific question what makes a successful personal statement Using a collection of real life personal statements from students recently accepted into Cambridge University across all subjects the authors provide a behind the scenes look into what it takes to be admitted into a top academic institution The result is a book that offers a rare insight into the often opaque and complex thought process that goes into accepting or rejecting a candidate and provides a benchmark for all students looking to study at top universities around the world
