*Demarketing* Nigel Bradley, Jim Blythe, 2013-10-23 We all understand the basic principles underpinning marketing activity to identify unfulfilled needs and desires and boost demand for the solutions a product is offering. The mantra is always sell more. De marketing tries for the very opposite. Why would a company actively try to decrease demand? There are many good reasons to do so: a firm cannot supply large enough quantities or wants to limit supply to a region of narrow profit margin. Or crucially to discourage undesirable customers: those that could be bad for brand reputation or in the case of the finance sector high risk. De marketing can yield effective solutions to these issues effectively curtailing demand yet crucially not destroying it. Nevertheless the fundamental negativity of de marketing strategies often causes organisations to hide them from view and as a result they are rarely studied. This then is the first book to cast light on the secretive counterintuitive world of de marketing deconstructing its mysteries and demonstrating how to incorporate them into a profit driven marketing plan. A selection of thought leaders in strategic marketing mix theory with illustrative global cases providing insight into how these strategies have been employed in practice and measuring their successes and failures. It's a must read for any student or researcher that wants to think differently about marketing.

**Changing Scenario of Business and E-Commerce**, *H2H Marketing* Philip Kotler, Waldemar Pfoertsch, Uwe Sponholz, 2020-12-12 In H2H Marketing the authors focus on redefining the role of marketing by reorienting the mindset of decision makers and integrating the concepts of Design Thinking, Service Dominant Logic and Digitalization. It's not just technological advances that have made it necessary to revisit the way everybody thinks about marketing: customers and marketers as human decision makers are changing too. Therefore having the right mindset, the right management approach and highly dynamic implementation processes is key to creating innovative and meaningful value propositions for all stakeholders. This book is essential reading for the following groups: Executives who want to bring new meaning to their lives and organizations; Managers who need inspirations and evidence for their daily work in order to handle the change management needed in response to the driving forces of technology, society and ecology; Professors, trainers and coaches who want to apply the latest marketing principles; Students and trainees who want to prepare for the future; Customers of any kind who need to distinguish between leading companies; Employees of suppliers and partners who want to help their firms stand out. The authors review the status quo of marketing and outline its evolution to the new H2H Marketing. In turn they demonstrate the new marketing paradigm with the H2H Marketing Model which incorporates Design Thinking, Service Dominant Logic and the latest innovations in Digitalization. With the new H2H Mindset, Trust and Brand Management and the evolution of the operative Marketing Mix to the updated dynamic and iterative H2H Process they offer a way for marketing to find meaning in a troubled world.
