### **WHY DO AT&T AND ITS AFFILIATES TEST?**

At AT&T, we pride ourselves on matching the best jobs with the best people. To do this, we need to better understand your skills and abilities to make sure that you are indeed the right match for the job. Our ultimate goal is to set you up for success in your career at AT&T (that is, if AT&T is the right match for you). Research has shown that tests provide accurate measures of people's skills and abilities and, therefore, we use tests to identify people who are the best match for the job. Our philosophy is simple...if you succeed in your role, then we succeed as a company.

### **WHAT IS THE TECHNICAL/MECHANICAL TEST III (TMT III)?**

The TMT III is a computerized adaptive test (CAT), which tailors the questions asked based on how you responded to previous questions. As compared to traditional tests, CATs allow for more accurate measurement of skills and abilities. The TMT III consists of three test sections described below. It is recommended to block 1 hour and 30 minutes to complete the TMT III:

1. The first test section assesses your ability to follow standard work instructions and engage in basic problem solving to address issues similar to those commonly faced in technician jobs. You will review standard work instructions presented in text, tables, and diagrams. You must identify key conditions and solve problems to determine the correct answer to each question. This section contains 11 questions, and you will have 2 minutes to answer each question. If you have not chosen an answer when this time limit expires, the question will be counted as incorrect. This section does not allow you to skip questions or review your answers to previous questions. The maximum time allowed for this test section is 22 minutes.
2. The second test section assesses your ability to use knowledge of mechanical principles and physical laws to solve problems similar to those commonly faced in technician jobs. In this section you will shown objects or events depicted in drawing and be asked a question about it. You are asked to read the question, examine the drawing and choose between alternative answers to the question. This test section contains 21 questions, and you will have 45 seconds to answer each. If you have not chosen an answer when this time limit expires, the question will be counted as incorrect. This section does not allow you to skip questions or review your answers to previous questions. The maximum time allowed for this test section is 15 minutes and 45 seconds.
3. The third test section assesses work orientation and customer service skills in a variety of situations. This test section contains 100 questions set up as pairs of statements. You simply need to indicate which statement within the pair that you agree with more. This section does not allow you to skip questions or review your answers to previous questions. This test section is untimed, but most test takers will finish in about 30 minutes.
