- 4. Organ level - study of the structure and function of organs
- 5. System level - study of the structure and function of body systems
- 6. Organism level - study of the structure and function of the whole body

CELLS AND TISSUES

Cells are the basic units of structure and function of the body

Characteristics of living organisms

Living organisms are characterized by the following traits:

- 1. Organization - the ability to maintain a highly ordered internal structure
- 2. Metabolism - the ability to convert energy and matter into other forms
- 3. Growth - the ability to increase in size and complexity
- 4. Reproduction - the ability to produce offspring
- 5. Response - the ability to respond to environmental changes

The tissue is the group of cells that work together to perform a specific function

- 1. Epithelial tissue - covers the body and lines internal organs
- 2. Connective tissue - supports and connects other tissues
- 3. Muscle tissue - contracts to produce movement
- 4. Nervous tissue - transmits electrical signals

ORGANS

Organs are structures made of different types of tissues

Each organ has a specific function in the body

Example: Heart pumps blood throughout the body

Example: Stomach digests food

Example: Lungs exchange gases

Organ systems

Organ systems are groups of organs that work together

Example: Digestive system includes mouth, stomach, and intestines

Example: Circulatory system includes heart and blood vessels

Example: Respiratory system includes trachea and lungs

Body systems

Body systems are groups of organ systems that work together

Example: Cardiovascular system includes heart and blood vessels

Example: Respiratory system includes trachea and lungs

Example: Digestive system includes mouth, stomach, and intestines

Cardiovascular system

The cardiovascular system is responsible for circulating blood throughout the body

It consists of the heart, blood vessels, and blood

The heart pumps blood through the blood vessels

Blood carries oxygen and nutrients to the cells

It also carries waste products away from the cells

The cardiovascular system is essential for the survival of the body

It is the most complex and largest organ system in the body

It is also the most important organ system in the body

It is the organ system that keeps the body alive

It is the organ system that makes the body work

It is the organ system that gives the body life

It is the organ system that makes the body strong

It is the organ system that makes the body healthy

It is the organ system that makes the body beautiful

It is the organ system that makes the body happy

It is the organ system that makes the body whole

It is the organ system that makes the body complete

It is the organ system that makes the body perfect

It is the organ system that makes the body divine

It is the organ system that makes the body eternal

It is the organ system that makes the body immortal
