Asia's demand for second generation financial institutions and markets needs to be met in order for the region's further development to be sustained This book provides a compelling fact based assessment of current practices and regulations in Asia's financial institutions and markets and carefully documents the exciting opportunities and challenges that lie ahead in the region's financial systems This book differs in design from typical treatments of financial institutions and markets because its focus is on Asia rather than using the US model in terms of market configurations or products as a benchmark and it takes a contemporary and forward looking view of financial markets Examples of practice from Asia are used to illustrate major accepted themes in finance and financial regulation To the extent that Asia's main economies share characteristics that are distinct for example in the relationship between government and the banking sector or in aspects of corporate governance the book will discuss the consequences for market operation and intermediation The book's carefully structured facts and rigorously argued analysis carry important implications both for students in business and law and for professionals new to financial markets in Asia It will change the way that Asian financial markets and institutions is taught in universities as well as provide a valuable resource for professionals working in finance in Asia      **Beyond Borders: The New Regionalism in Latin America**

**Political Economy of Digital Ecosystems** Meelis Kitsing, 2021-08-18 This book connects political economy perspectives with scenario planning for mapping out future trajectories of digital ecosystems The focus is purposefully on digital ecosystems as it encompasses economic political and social contexts on a global national and local level The diversity of political economy approaches allows the author to explore alternative meanings of digital ecosystem development which is particularly useful for envisioning alternative futures Often visions about the future of digital ecosystems suffer from a lack of imagination and confirmation bias which is favorable to the extrapolation of current trends A wide range of political economy perspectives applied through positivist theorizing in this book shows different interpretations of developments in digital ecosystems Scenario planning teams around the world have applied a collective imagination to show how future trajectories can be radically different from the current trends The book outlines meta scenarios for alternative futures of the political economy of digital ecosystems by reviewing and synthesizing the work of foresight teams These meta scenarios served as insights for developing four scenarios for European digital ecosystems through the workshops with high level executives and experts The scenarios identified the nature of EU cooperation and the development of digital infrastructure as key drivers These four scenarios developed in the workshops are further operationalized in a specific context by exploring the implications for Estonia as well as for Chinese investments in European platforms This exercise shows how scenarios of digital ecosystems can be used for stress testing decisions and strategies Decision makers students scholars and other stakeholders in a wide range of industries ranging from academia to ride sharing can use the scenarios for reframing different development trajectories and future proofing their strategies The scenarios can be further developed and modified for specific purposes and contexts as they are not written in stone

**East Asian Development Model** Shipping Hua, Ruihua Hu, 2014-12-17 Given the impressive growth in East Asia after World War II initially led by Japan the region s development models have been scrutinized since the 1980s The shared Confucian cultural heritage strong government guidance and export led economies were often cited as contributors to the

impressive growth However major changes have taken place in Asia on and around the turn of the century Japan experienced two decades of economic slow down while World Bank figures reveal that China is poised to become the largest economy in the world in 2014 overtaking the United States Bearing this in mind is it even possible to formulate an East Asian development model in the context of a shifting twenty first century And if so what is it This book addresses this issue by looking at the economic political and cultural perspectives of China Japan and South Korea focusing on dynamism and potential consensus regarding an East Asian development model The chapters offer a historical background to the East Asian development model as well as in depth case studies of each of the countries concerned to show that whilst the East Asian development model does have distinct characteristics as compared with other areas and other countries may draw some insights from the East Asian experience it is not a panacea that fits all circumstances and fits all times This book will be welcomed by students and scholars of Asian economics Asian politics international political economy and development studies
