

Sharks

Read the passage and answer the questions below.

Sharks are ancient and magnificent creatures. They have ruled the oceans for the last 400 million years. You can find sharks in every ocean in the world, and some even live in rivers and lakes. Sharks are made of a flexible material called cartilage. You have cartilage in your ears— that's why they bend! There are more than 500 known species of shark in the world. Some are no larger than your hand, while others can be the size of a school bus. The whale shark is the largest animal on earth and can grow up to 30 ft long. Sadly, shark numbers are decreasing. Each year, millions of sharks are hunted and killed for their fins. Scientists have studied the number of sharks in the ocean and are finding that their population size is decreasing. You can help sharks by learning more about them and spreading awareness— share with someone what you learned in this passage!

1. What are sharks made of? Where can you find this material in humans?

2. Which ocean can you find sharks in?

3. Why are shark numbers decreasing?
