Introduction to Materials Science and Engineering Yip-Wah Chung, 2006-12-13 Our civilization owes its most significant milestones to our use of materials Metals gave us better agriculture and eventually the industrial revolution silicon gave us the digital revolution and we are just beginning to see what carbon nanotubes will give us Taking a fresh interdisciplinary look at the field Introduction to Materials Science **Bulletin of the Atomic Scientists**, 1961-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world **Scientific and Technical Aerospace Reports**, 1991 **Biochemistry of Sulfur** Ryan J. Huxtable, 2013-11-11 There can be few elements with a biochemistry as coherent as that of sulfur This important element is crucial to myriad aspects of metabolism catalysis and structure The plurality of functions in which sulfur is involved derives squarely from the numerous oxidation states in which it may exist some having great stability some being capable of ready redox interconversions and yet others having great instability As a result the flux of sulfur from the geosphere through the various kingdoms of life leaves few biochemical processes unaffected Although there are large gaps in the fabric of our basic knowledge of sulfur biochemistry it is sufficiently framed to allow a unified and organized story a story which many of the best known names in biochemistry have helped to write It has been both a task and a privilege to try and summarize this story one that is enormous complex fast moving still developing and above all exciting I suppose that no monographer of such a vast subject could be satisfied with his efforts It is unfortunately probable that in attempting this task I have made as many errors as a Stilton cheese has blue streaks and as many omissions as a Swiss cheese has holes Perfection is not to be achieved in a monograph Inasmuch as I have succeeded the credit belongs to those whose efforts gave us the knowledge we have Where I have failed the fault is only mine **Congressional Record** United States.
