Smokescreen Kevin A. Sabet, 2021-04-20 From the leading authority on marijuana a man who has served as White House advisor on drugs to three different administrations and who NBC News once called the prodigy of drug politics comes the remarkable and shocking expos about how 21st century pot today's new and highly potent form of the drug is on the rise spreading rapidly across America by an industry intent on putting rising profits over public health Smokescreen What the Marijuana Industry Doesn't Want You to Know examines the inside story behind the headlines containing accounts from Sabet's time in the Obama administration to stunning revelations from whistleblowers speaking out for the first time What it finds is how the marijuana industry is running rampant without proper oversight leaving Americans' health seriously at risk Included are interviews with industry insiders who reveal the hidden dangers of a product they had once worshipped Also contained in these pages are insights from a major underground market dealer who admits that legalization is hastening the growth of the illicit drug trade And more to the heart of the issue are the tragic stories of those who have suffered and died as a result of marijuana use and in many cases as a result of its mischaracterization Readers will learn how power brokers worked behind the scenes to market marijuana as a miracle plant in order to help it gain widespread acceptance and to set the stage for the lucrative expansion of recreational pot The author of this compelling first person narrative leading the national fight against the legalization of cannabis through his nonprofit Smart Approaches to Marijuana aka SAM is Kevin Sabet As a policy advisor to everyone from county health commissioners to Pope Francis and a frequent public speaker on television radio and through other media outlets his analysis is consistently relied upon by those who recognize what's at stake as marijuana lobbyists downplay the risks of massive commercialization A book several years in the making filled with vivid characters and informed by hundreds of interviews and scores of confidential documents Sabet's Smokescreen lays bare the unvarnished truth about marijuana in America

Pollywog and Shellback Tales of the South Pacific John H. Gamble, 2011 Learn about little known combat ventures aboard a U S Navy vessel during World War II from the eyewitness accounts of Navy veteran John Gamble Pollywog and Shellback Tales of the South Pacific describes life as a World War II sailor in the Pacific theater Gamble throws us onboard his ship the same way he was thrown at breakneck speed Leaving high school friends behind Gamble joins the U S Navy and is trained as a radioman in the new technology of radar He learns the basics of Navy life forms friendships along the way and helps to make his ship what the admirals need it to be a fighting machine to defeat the enemy and bring peace back to the Pacific While Pollywog and Shellback Tales of the South Pacific is not a complete summary of Gamble's wartime experiences the stories give an astounding look at what it was like to be a sailor on a Navy ship during the battles of the Pacific Glimpse the individual perspective of combat at sea and imagine one man's commitment to his country no matter the cost John Gamble Sr was born and raised in the Atlantic coast region of what is now part of New York City Many years after returning from naval combat in the Pacific he was one of relatively few

workers fortunate enough to have worked on the lunar landing module this was destined to make the first moon landing He could see the whole world opening up and felt caught in the upheaval as his generation came into being He witnessed Einstein s theories become reality as the atom was split and the scientific wonder gave birth to a horrific nuclear arms race He witnessed what were then the world s two tallest buildings being erected and witnessed their demise Mindful of Nostradamus s papers he grew fascinated as the changes in technology brought new dimensions to his thinking According to Gamble there are many bittersweet moments in life We must choose to have hope and be among those who desire to see a hopeful future

Smokescreen Chad T. Hanson,2021-05-25 Smokescreen cuts through years of misunderstanding and misdirection to make an impassioned evidence based argument for a new era of forest management for the sake of the planet and the human race Natural fires are as essential as sun and rain in fire adapted forests but as humans encroach on wild spaces fear arrogance and greed have shaped the way that people view these regenerative events and given rise to misinformation that threatens whole ecosystems as well as humanity s chances of overcoming the climate crisis Scientist and activist Chad T Hanson explains how natural alarm over wildfire has been marshaled to advance corporate and political agendas notably those of the logging industry He also shows that in stark contrast to the fear driven narrative around these events contemporary research has demonstrated that forests in the United States North America and around the world have a significant deficit of fire Forest fires including the largest ones can create extraordinarily important and rich wildlife habitats as long as they are not subjected to postfire logging Smokescreen confronts the devastating cost of current policies and practices head on and ultimately offers a hopeful vision and practical suggestions for the future one in which both communities and the climate are protected and fires are understood as a natural and necessary force

A Righteous Smokescreen Sam Lebovic,2022-05-10 In the years immediately after World War II the United States broadcast to the world not just its power but its values Sam Lebovic here focuses on one of those professed ideals the free flow of information That trope became a proxy for America s special brand of imperial democracy and it both abetted and constituted the spread of American culture and values worldwide By studying visa and passport policy funding for educational exchange and school construction the purchase of land for embassies the rights of international correspondents and other mundane matters Lebovic reveals globalization as a consequence of quotidian world ordering not of high minded abstractions like liberal internationalism

The Times When Men Must Die: The Story of the Destruction of the Philippine Army During the Early Months of World War II in the Pacific, December 1941-May 1942 , Scientists Against Time James Phinney Baxter III,2023-11-05 Winner of the 1947 Pulitzer prize in History Mr Baxter s history of the OSRD is a fine book obviously one of the most important documents written so far about the war The author has a reticent clear style admirably suited to pin

down his refractory material His preoccupation with technical detail has not diminished his grasp of wartime science as a whole E B Garside The New York Times A readable mixture of history and science This volume covers the whole span of scientific development radar and radar countermeasures loran proximity fuses the DUKW and Weasel incendiaries and flame throwers military medicine including discussion of high altitude effects penicillin and insecticides and finally the Manhattan project and the atomic bomb This official history of OSRD should be required reading for admirals generals and all officers who ever expect some day to exist in the rarefied atmosphere of high level military and naval planning This volume is the triumphant battle cry of American men of science returning with their shields Earl W Thompson Proceedings of the US Naval Institute This is the official history of the remarkable achievements of the Office of Scientific Research and Development during World War II by the President of Williams College Robert Gale Woolbert Foreign Affairs An admirable book Richard E Danielson The Atlantic Here is one of the most significant books of World War II It is as Dr Vannevar Bush says in a foreword the brief official history of the Office of Scientific Research and Development It is the history of a rapid transition from warfare as it has been waged for thousands of years by the direct clash of hordes of men to a new type of warfare in which science becomes applied to destruction on a wholesale basis It marks therefore a turning point in the broad history of civilization The reader is constantly impressed by the valuable results obtained by the pooling of the work of British Canadian and American scientists Throughout the entire book one idea seems to stand out above all others namely that free men working as a team can outperform all the efforts of those who are driven by bureaucratic decrees John W Oliver The American Historical Review This is a book for which American scientists have been waiting it presents a clear detailed and yet stylistically most attractive account of the victory made possible by the civilian scientific research effort of our Nation during World War II It will be difficult for anyone to read this book and not become an advocate of a strong federally supported science organization to continue the research necessary for our future military preparedness and for the solution of basic peacetime problems as well Leonard Carmichael Science
