during the last millennium **Invasions** Christian K. Melby, 2025-04-15 *Invasions* is an ambitious new and authoritative study of one of the defining cultural products of the Victorian and Edwardian eras. By the outbreak of war in 1914, invasion scare fiction had profoundly changed British society, becoming not just a vibrant part of popular culture but a reference point among military planners, advertisers, and politicians. This intersection between politics and culture, between entertainment and war planning, sets invasion scare stories apart as one of the most versatile and interesting fictional products in modern British history. Building on recent work in both history and literature studies, *Invasions* is the first study of invasion scare fiction to examine both the form that is fiction and the function, the political argument, of the genre. Rethinking Khoe and San Indigeneity, Language and Culture in Southern Africa Julie Grant, Keyan G. Tomaselli, 2022-09-19 The San hunter-gatherers and Khoe herders of southern Africa were dispossessed of their land before, during, and after the European colonial period which started in 1652. They were often enslaved and forbidden from practicing their culture and speaking their languages. In South Africa, under apartheid after 1948, they were reclassified as Coloured, which further undermined Khoe and San culture, forcing them to reconfigure and realign their identities and loyalties. Southern Africa is no longer under colonial or apartheid rule; the San and Khoe, however, continue in the struggle to maintain the remnants of their languages and cultures and are marginalised by the dominant peoples of the region. The San, in particular, continue to command very extensive research attention from a variety of disciplines, from anthropology and linguistics to genetics. They are, however, usually studied as static historical objects, but they are not merely peoples of the past, as is often assumed; they are very much alive in contemporary society with cultural and language needs. This book brings together studies from a range of disciplines to examine what it means to be Indigenous Khoe and San in contemporary southern Africa. It considers the current constraints on Khoe and San identity, language, and culture, constantly negotiating an indeterminate social positioning where they are treated as the inconvenient indigenous. Usually studied as original anthropos, but out of their time, this book shifts attention from the past to the present and how the San have negotiated language, literacy, and identity for coping in the period of modernity. It reveals that Afrikaans is indeed an African language, incubated not only by Cape Malay slaves working in the kitchens of the early Dutch settlers but also by the Khoe and San who interacted with sailors from passing ships plying the West coast of southern Africa from the 14th century. The book re-examines the idea of literacy, its relationship to language, and how these shape identity. The chapters in this book were originally published in the journal *Critical Arts: South North Cultural and Media Studies*. **Handbook of Research on Advancements in Organizational Data Collection and Measurements: Strategies for Addressing Attitudes, Beliefs, and Behaviors** Bocarnea, Mihai C., Winston, Bruce E., Dean, Debra, 2021-06-25 Different organizational instruments have been developed and adapted with proven reliability and validity to measure organizational attitudes, beliefs, and behaviors. These new data collection instruments can be used in organizational management and leadership, including human resource development. This technology will enhance data

collection reliability and accurately assess management and leadership for improved organizational outcomes Now that this new style of data collection and measurement has entered the workplace it is essential to understand both the benefits and challenges of these newly developed instruments as well as looking at how they are used where they are implemented and how the technology itself functions The Handbook of Research on Advancements in Organizational Data Collection and Measurements Strategies for Addressing Attitudes Beliefs and Behaviors includes a collection of 15 newly developed organizational instruments with proven reliability and validity meant to measure organizational attitudes beliefs and behaviors Additionally chapters will address methodological issues related to scale development and use as well as specific technologies used such as the use of machine learning in future performance assessment This book is ideal for faculty consultants and managers along with practitioners stakeholders researchers academicians and students interested in advancing the theoretical understanding and the practical application of using newly developed instruments for addressing organizational attitudes beliefs and behaviors
