Corruption Risks in Nigeria'S Defence and Security Establishments Jude Uddoh Ph.D.,2016-02-05 This work attempts to assess corruption risks in five key areas of Nigerias defence and security establishments namely political financial personnel operations and procurement Using a simple and straightforward question and answer format the assessment draws from interviews with key players in the industry as well as from secondary sources The scope of the work includes the last few years of President Goodluck Jonathans administration and the threshold of the administration of

President Muhammadu Buhari a truly epochal period in the history of Nigeria's fight against corruption but also reflects policy gaps inherent in the transition in government. The work contributes to an area of literature which is both scanty and characterized by much secrecy. It is hoped therefore that this contribution will not only stimulate more frank and open discussion on the subject of corruption risks in Nigeria's defence and security sector but would also act as both a template and benchmark on which policy makers can embark on genuine and meaningful reforms.

Constitutional Erosion in Brazil Emilio Peluso Neder Meyer, 2021-07-15 This book provides a fascinating analysis of a single jurisdiction, Brazil, and accounts for both the successes and the failures of its most recent constitutional project inaugurated by the Constitution of 1988. It sets out the following aspects of the constitutional development and erosion: the different phases of the promised transition from military rule to a social democratic constitutionalism; the obstacles to democratisation derived from the absence of true institutional reforms in the judicial branch and in the civil-military relationship; the legal and social practices which maintained a structure that obstructed the emergence of an effective social democracy such as the neoliberal pattern; the acceptance in the political field of unlawful organisations such as the *milícias* and the way the digital revolution has been harming the formation of democratic sovereignty. Situating Brazil in the global context of the revival of authoritarianism it details the factors which are common to the third wave of democratisation reflux. Accounting for those aspects particular to the Brazilian jurisdiction it shows that there is a tension in the Brazilian constitution. On the one hand such constitutionalism was renewed by democratic pressure on governments to undertake social politics since 1988. On the other hand it retained authoritarian practices through the hands of diverse institutions and political actors. By exploring the ideas of constitutional erosion and collapse as well as democratic social and digital constitutionalism the book presents a comparative analysis of Brazil and other jurisdictions including the United States, South Africa and Peru.

To Govern the Globe Alfred W. McCoy, 2021-11-16 In a tempestuous narrative that sweeps across five continents and seven centuries this book explains how a succession of catastrophes from the devastating Black Death of 1350 through the coming climate crisis of 2050 has produced a relentless succession of rising empires and fading world orders. During the long centuries of Iberian and British imperial rule the quest for new forms of energy led to the development of the colonial sugar plantation as a uniquely profitable kind of commerce. In a time when issues of race and social justice have arisen with pressing urgency the book explains how the plantation's extraordinary profitability relied on a production system that literally worked the slaves to

death creating an insatiable appetite for new captives that made the African slave trade a central feature of modern capitalism for over four centuries After surveying past centuries roiled by imperial wars national revolutions and the struggle for human rights the closing chapters use those hard won insights to peer through the present and into the future By rendering often opaque environmental science in lucid prose the book explains how climate change and changing world orders will shape the life opportunities for younger generations born at the start of this century during the coming decades that will serve as the signposts of their lives 2030 2050 2070 and beyond *Political Handbook of the World 2018-2019* Tom Lansford,2019-03-19 The Political Handbook of the World provides timely thorough and accurate political information with more in depth coverage of current political controversies than any other reference guide The updated 2018 2019 edition will continue to be the most authoritative source for finding complete facts and analysis on each country s governmental and political makeup Compiling in one place more than 200 entries on countries and territories throughout the world this volume is renowned for its extensive coverage of all major and minor political parties and groups in each political system It also provides names of key ambassadors and international memberships of each country plus detailed profiles of more than 30 intergovernmental organizations and UN agencies This comprehensive update will include coverage of current events issues crises and controversies from the course of the last two years including Elections across Europe Referendum in Ireland Rohingya genocide in Myanmar The Venezuelan dictatorship The renaming of Swaziland to eSwatini Qatar diplomacy changes Historic meeting between the United States and North Korea Establishment of a new governing coalition in Liberia
