Measuring and Visualizing Space in Elementary Mathematics Learning Richard Lehrer, Leona Schauble, 2023-03-31 Measuring and Visualizing Space in Elementary Mathematics Learning explores the development of elementary students' understanding of the mathematics of measure and demonstrates how measurement can serve as an anchor for supporting a deeper understanding of number operations and rational numbers. The concept of measurement is centrally implicated in a number of mathematical operations yet is not often given the placement it deserves in the elementary mathematics curriculum. By drawing on K-5 classroom research, authors Lehrer and Schauble have been able to articulate a learning progression that describes benchmarks of student learning about measure in length, angle, area, volume, and rational number, exploring related concepts, classroom experiences, and instructional practices at each stage. Offering a unique research-driven resource for helping students develop a deep understanding of measurement to further enhance mathematical understanding as well as further learning in other STEM disciplines, the book will be relevant for scholars, teacher educators, and specialists in math education. The book is accompanied by online resources developed for practitioners, including instructional guides, examples of student thinking, and other teacher-focused materials helping clarify how to bring concepts of measure and rational number to life in classrooms.

Space, Structure, and Story Tamra Stambaugh, Emily Mofield, 2021-09-23 Winner of the 2017 NAGC Curriculum Studies Award, Space, Structure, and Story integrates Earth and space science with science fiction and nonfiction texts, poetry, and art. This unit developed by Vanderbilt University's Programs for Talented Youth is aligned to the Common Core State Standards and Next Generation Science Standards. Students explore advanced science and ELA content through the lens of structure, its parts, purpose, and function. Mobius strips, the hero's journey, dystopian fiction, black holes, Einstein's relativity, stars, and moons are just a few of the captivating in-depth topics explored through accelerated, content-engaging activities and differentiated tasks. Ideal for gifted classrooms or gifted pull-out groups, the unit features poetry from Carl Sandburg, Henry Wadsworth Longfellow, and C. S. Lewis; art from M. C. Escher, Vincent van Gogh, Claude Monet, and Salvador Dalí; a novel study featuring *A Wrinkle in Time* by Madeleine L'Engle; short stories from Isaac Asimov and Ray Bradbury; speeches from President John F. Kennedy and President Barack Obama; and informational texts about gravity, orbits, and black holes. Grades 4-6.
