Export Planning Joris Leeman, 2021-03-05 When a company initiates export development and internationalisation, it is essential to follow a systematic strategy formulation and decision making process. Export Planning 2nd edition provides a methodology to plan and achieve globalisation. This process of export planning consists of four phases: export policy, export audit, export plan, and export roll out. Export Planning describes these 4 phases and provides a 10 step guide for the construction of an international marketing plan. Export Planning will enable readers to: 1 systematically select and plan entries into new international markets; 2 enhance the chances of success through an integrated review of analysis and strategy by means of marketing, logistics, organization, and finance; 3 assemble a sound line of reasoning from strategy to implementation. Export Planning is a practical book. It describes export and international marketing at a strategic, tactical, and operational level, and combines theoretic models with relevant practical experience. New to this 2nd edition is an additional chapter on the implementation of the export transaction. This book is intended for bachelor and graduate students at business schools and universities. This book is also useful for anyone who wants to know more about export planning, international marketing, and international market development.
