

STUDENT Learning *Objective*

SLO

Writing student learning objectives can feel like a complicated task. These are created based on your personal, grade level, or district goal and your expectations for student progress. SLOs are tailored to your class and are very individualized. Some things to consider before selecting a skill for your SLO: What is a district goal? What is a grade level goal? Based on assessments, which skill needs to be addressed? Which skill/concept appears to be the most difficult for students to grasp?

SLO documentation should include:

- Identifying a skill to improve
- Composing a focus statement
- Noting the corresponding TEKS, or skills
- Determining what various levels of students can do, should be able to do, and will be able to do
- Creating a guide for growth that includes differentiation, strategies to monitor progress, and a plan for collaborating with other professionals

The examples included are generic and meant to guide you in creating your own goal. Keep in mind that each principal, or approver, will have different expectations in how these are written. They may have specific verbiage or want it to be more or less detailed. I've included two sample SLOs to get you started. Both are related to writing, 4th grade and 6th grade; however, they can be easily modified for any grade or subject. There is space for you to create your own if you download the file.

Expanding Opportunities to Link Research and Clinical Practice JoAnne Ferrara, Janice L. Nath, Irma N. Guadarrama, Ronald Beebe, 2017-03-01 This volume in the Research in Professional Development Schools book series considers the role professional development schools PDSs play in expanding opportunities for linking research and clinical practice As in past volumes of this series PDS practitioners and researchers make a compelling case for the power of micro level initiatives to change practice Contributors share ideas to expand PDS work beyond site specific contexts to include a broader macro level agenda for clinical practice Authors hope to inspire large scale PDS reform through replication of successful initiatives featured in this volume Evoking change is not easy Nonetheless series editors and contributors conclude that PDSs generate a critical mass of PK 16 educators willing to form partnerships to address enduring educational dilemmas This volume represents a cross section of PDS stakeholders engaged in research along with innovative projects that uncover the richness of clinical practice Higher education faculty school practitioners and preservice teachers featured in these chapters explore the ways PDSs deepen clinical practice while enriching teaching and learning We begin with the discussion by Beebe Stunkard and Nath on the National Association for Professional Development Schools NAPDS role to support teacher candidates clinical practice through the cooperative efforts of university and school based personnel The authors explain NAPDS history and advocacy over the years to promote a context for schooluniversity partnerships to thrive and expand As the premier association guiding the work of collaborative P 12 higher education partnerships we welcome the insightful perspectives provided Resources in Education ,1999-04

Teaching on Assessment Sharon L. Nichols, Divya Varier, 2021-03-01 In an age where the quality of teacher education programs has been called into question it is more important than ever that teachers have a fundamental understanding of the principles of human learning motivation and development Theory to Practice Educational Psychology for Teachers and Teaching is a series for those who teach educational psychology in teacher education programs At a time when educational psychology is at risk of becoming marginalized it is imperative that we as educators walk our talk in serving as models of what effective instruction looks like Each volume in the series draws upon the latest research to help instructors model fundamental principles of learning motivation and development to best prepare their students for the diverse multidimensional uncertain and socially embedded environments in which these future educators will teach The inaugural volume Teaching on Assessment is centered on the role of assessment in teaching and learning Each chapter translates current research on critical topics in assessment for educational psychology instructors and teacher educators to consider in their teaching of future teachers Written for practitioners the aim is to present contemporary issues and ideas that would help teachers engage in meaningful assessment practice This volume is important not only because of the dwindling presence of assessment related instructional content in teacher preparation programs but also because the policy changes in the last two decades have transformed the meaning and

use of assessment in K 12 classrooms Praise for Teaching on Assessment This thought provoking book brings together perspectives from educational psychology and teacher education to examine how assessment can best support student motivation engagement and learning In the volume editors Nichols and Varier present a set of chapters written by leaders in the field to examine critical questions about how to best prepare teachers to make instructional decisions understand assessment within the context of learning and motivation theory and draw on assessment in ways which can meet the needs of diverse learners Written in a highly accessible language and style each chapter contains clear takeaway messages designed for educational psychologists teacher educators teachers and pre service teachers This book is essential reading for anyone involved in teaching or developing our future teaching professionals Lois R Harris Australian Catholic University This impressive book provides a wealth of contemporary and engaging resources ideas and perspectives that educational psychology instructors will find relevant for helping students understand the complexity of assessment decision making as an essential component of instruction Traditional assessment principles are integrated with contemporary educational psychology research that will enhance prospective teachers decision making about classroom assessments that promote all students learning and motivation It is unique in showing how to best leverage both formative and summative assessment to boost student engagement and achievement enabling students to understand how to integrate practical classroom constraints and realities with current knowledge about self regulation intrinsic motivation and other psychological constructs that assessment needs to consider The chapters are written by established experts who are able to effectively balance presentation of research and theory with practical applications Notably the volume includes very important topics rarely emphasized in other assessment texts including assessment literacy frameworks diversity equity assessment strategies for students with special needs and data driven decision making The book will be an excellent supplement for educational psychology classes or for assessment courses introducing students to current thinking about how to effectively integrate assessment with instruction James McMillan Virginia Commonwealth University

Human Capital in Agribusiness and Agriculture Benjamin Drean, Eny Lestari Widarni, 2021-07-27 This book is representative of a fraction of what we have learned over the years in various countries around the world We study various things related to human resource development in various countries to understand the problems solutions and forms of perfect education for our students We also study issues related to food because food has an important relationship with health namely adequate nutrition and human energy sources Health and including food are important factors in building human capital We found many food problems in various countries including developed countries A very popular issue related to labor This book presents a small part of our study in 22 countries on 5 continents in this book we focus on looking globally to see comparisons between countries by vectoring human variables and the performance of the agricultural industry for each country We conduct qualitative studies to understand the problems in each country we visit and study so that we can provide solutions or suggestions that might be a

solution for the country where we live and study Sometimes the solution is a collaboration between countries Because we find that every country whether developed or developing country has strengths and weaknesses and has the potential for beneficial collaboration To understand globally and comprehensively or in aggregate we use quantitative studies with official data from the world bank Both qualitative and quantitative have their own strengths and weaknesses because they have different points of view
