Unmanned Driving Systems for Smart Trains Hui Liu, 2020-11-13 *Unmanned Driving Systems for Smart Trains* explores the core technologies involved in unmanned driving systems for smart railways and trains from foundational theory to the latest advances. The volume introduces the key technologies, research results and frontiers of the field. Each chapter includes practical cases to ground theory in practice. Seven chapters cover key aspects of unmanned driving systems for smart trains including performance evaluation, algorithm based reasoning and learning strategy, main control parameters, data mining and processing, energy saving optimization and control, and intelligent algorithm simulation platforms. This book will help researchers find solutions in developing better unmanned driving systems. Responds to the expansion of smart railways and the adoption of unmanned global systems. Covers core technologies of unmanned driving systems for smart trains. Details a large number of case studies and experimental designs for unmanned railway systems. Adopts a multidisciplinary view where disciplines intersect at key points. Gives both foundational theory and the latest theoretical and practical advances for unmanned railways.

Proceedings of the 3rd International Conference on Culture, Design and Social Development (CDSD 2023)

Youbin Chen, Chaoqun Shen, Joanna Rak, 2024-03-26 This is an open access book. Culture is the spiritual activity and product of human society relative to economy and politics. The traditional concept of human beings believes that culture is a social phenomenon, a product created by human beings for a long time and at the same time a historical phenomenon which is the accumulation of human society and history. The technical, economical and cultural nature of art design determines that only with high social and economic development can art and culture flourish. Art design is the product of the combination of art and technology. Art design is also a kind of productivity which promotes the development of social economy. As a driving factor for social and economic development, design art will also better serve the social economy with its own more perfect operating system. The purpose of CDSD 2023 is to provide an international platform for experts, scholars, engineers and technicians and technical R D personnel engaged in related fields such as culture design and social development to share scientific research results, broaden research ideas, collide with new ideas and strengthen academic research and to explore the key challenges and research directions faced by the development of this field and promote the industrialization cooperation of academic achievements. Experts, scholars, business people and other relevant personnel from universities and research institutions at home and abroad are cordially invited to attend and exchange.
