 Urban Environments** Yilmaz, Zafer, Golem, Silvia, Costescu, Dorinela, 2023-01-16 The traditional urban transportation
 systems around the globe are now being transferred into green public transportation systems in an effort to mitigate CO2
 emissions and provide nature friendly transportation systems in cities and ultimately to increase citizens wellbeing
 Furthermore the cities are expected to transform their traditional transportation systems to cutting edge high technology
 green transportation systems in the near future due to regulations applied by the related authorities such as the EU and UN
 At the same time cities are undergoing a transformation from traditional to smart cities which is an inevitable process due to
 swift developments in technologies and smart systems Sustainable public transportation systems must be developed and
 adjusted to be applicable in future smart cities The Handbook of Research on Promoting Sustainable Public Transportation
 Strategies in Urban Environments considers the challenges and advantages of sustainable public transportation systems in
 urban areas and provides relevant theoretical frameworks the latest empirical research findings and an overview of the latest
 technological developments on the subject Covering key topics such as green vehicles sustainability and walkable cities this
