Crisis in the Red Zone Richard Preston,2020-04-03 NEW YORK TIMES BESTSELLER An urgent wake up call about the future of emerging viruses and a gripping account of the doctors and scientists fighting to protect us told through the story of the deadly 2013 2014 Ebola epidemic Crisis in the Red Zone reads like a thriller That the story it tells is all true makes it all more terrifying Elizabeth Kolbert Pulitzer Prize winning author of The Sixth Extinction From the 1 bestselling author of The Hot Zone now a National Geographic original miniseries This time Ebola started with a two year old child who likely had contact with a wild creature and whose entire family quickly fell ill and died The ensuing global drama activated health

professionals in North America Europe and Africa in a desperate race against time to contain the viral wildfire By the end as the virus mutated into its deadliest form and spread farther and faster than ever before 30 000 people would be infected and the dead would be spread across eight countries on three continents In this taut and suspenseful medical drama Richard Preston deeply chronicles the pandemic in which we saw for the first time the specter of Ebola jumping continents crossing the Atlantic and infecting people in America Rich in characters and conflict physical emotional and ethical Crisis in the Red Zone is an immersion in one of the great public health calamities of our time Preston writes of doctors and nurses in the field putting their own lives on the line of government bureaucrats and NGO administrators moving often fitfully to try to contain the outbreak and of pharmaceutical companies racing to develop drugs to combat the virus He also explores the charged ethical dilemma over who should and did receive the rare doses of an experimental treatment when they became available at the peak of the disaster Crisis in the Red Zone makes clear that the outbreak of 2013 2014 is a harbinger of further more severe outbreaks and of emerging viruses heretofore unimagined in any country on any continent In our ever more interconnected world with roads and towns cut deep into the jungles of equatorial Africa viruses both familiar and undiscovered are being unleashed into more densely populated areas than ever before The more we discover about the virosphere the more we realize its deadly potential Crisis in the Red Zone is an exquisitely timely book a stark warning of viral outbreaks to come
