Variational Inequalities in Mechanics Ivan Hlavacek, Jaroslav Haslinger, Jindrich Necas, Jan Lovisek, 2012-12-06 The idea

for this book was developed in the seminar on problems of continuum mechanics which has been active for more than twelve years at the Faculty of Mathematics and Physics Charles University Prague This seminar has been pursuing recent directions in the development of mathematical applications in physics especially in continuum mechanics and in technology It has regularly been attended by upper division and graduate students faculty and scientists and researchers from various institutions from Prague and elsewhere These seminar participants decided to publish in a self contained monograph the results of their individual and collective efforts in developing applications for the theory of variational inequalities which is currently a rapidly growing branch of modern analysis The theory of variational inequalities is a relatively young mathematical discipline Apparently one of the main bases for its development was the paper by G Fichera 1964 on the solution of the Signorini problem in the theory of elasticity Later J L Lions and G Stampacchia 1967 laid the foundations of the theory itself Time dependent inequalities have primarily been treated in works of J L Lions and H Bnlzis The diverse applications of the variational inequalities theory are the topics of the well known monograph by G Du vault and J L Lions *Les iniquations en micanique et en physique* 1972
