Hierarchical Clustering, Expectation maximization clustering, Agglomerative Clustering - Dendrograms, Agglomerative clustering in Soft-learn, Connectivity Constraints.

Introduction to Recommendation Systems : Naïve User based systems, Content based Systems, Model free collaborative filtering-singular value decomposition, alternating least squares.

Fundamentals of Deep Networks : Defining Deep learning, common architectural principles of deep networks, the building blocks of deep networks.

Clustering is an unsupervised learning as classes are not known, it groups the object or data elements without having advance knowledge of group definitions. These groups or partitions of data after clustering are called clusters. Clusters have high inter similarity and low intra similarity.

6.1 Hierarchical Clustering

The set of data objects is decomposed hierarchically using certain criteria. In hierarchical clustering, algorithms either follow the top-down or bottom-up approach.

Hierarchical clustering technique (Basic algorithm)

1. Calculate the distance and find a distance matrix or proximity matrix.
2. Consider each data point or object as a cluster.
3. Repeat.
4. Combine the two closest clusters.
5. Update the proximity matrix.
6. Until only a single cluster remains.

Note : Proximity matrix is symmetric, meaning that the numbers on the lower half of the diagonal will be the same as the numbers on the top-half of the diagonal.

Agglomerative Clustering

In Bottom-up approach, every object is considered to be a cluster and in subsequent iterations they are merged into a single cluster. Therefore, it is also called as Hierarchical Agglomerative Clustering (HAC).

Divisive Hierarchical Clustering

In this data objects are grouped in a top-down manner. Initially, all objects are in one cluster. Then the cluster is subdivided into smaller and smaller pieces, until each object forms a cluster on its own or until it satisfies certain termination conditions as the desired number of clusters are obtained. Divisive methods are not generally available, and rarely have been applied.
