## The Double-Helix Model

For Questions 8–13, on the lines provided, label the parts of the DNA molecule that correspond to the numbers in the diagram.

## 12.3 DNA Replication

### Lesson Objectives

- Summarize the events of DNA replication.
- Compare DNA replication in prokaryotes with that of eukaryotes.

### Lesson Summary

**Copying the Code** Each strand of the double helix has all the information needed to reconstruct the other half by the mechanism of base pairing. Because each strand can be used to make the other strand, the strands are said to be complementary. DNA copies itself through the process of **replication**:

- The two strands of the double helix unzip, forming replication forks.
- New bases are added, following the rules of base pairing (A with T and G with C).
- Each new DNA molecule has one original strand and one new strand.
- DNA polymerase** is an enzyme that joins individual nucleotides to produce a new strand of DNA.
- During replication, DNA may be lost from the tips of chromosomes, which are called **telomeres**.

**Biochemistry** Terry Brown, 2016-09-22 Biochemistry is a major new textbook designed and created specifically for briefer courses in the subject. Written by Prof Terry Brown of the University of Manchester author of Genomes and Gene Cloning the book provides the necessary detail and rigour expected for these courses but without the extraneous material found in the larger textbooks. With an increasing number of students taking a short course in biochemistry there is a growing need for a book that covers the subject concisely and succinctly. Biochemistry has been designed from the outset for these shorter courses it is not a cut down version of one of the larger books that dominate the market. Although it is shorter there is no compromise in content style and coverage. The book is attractively designed in full colour throughout with all the pedagogical features expected in a major textbook. It covers what students should be expected to know and is written in the clear and accurate writing style for which Terry Brown is widely lauded. With its competitive price and resources for adopting lecturers all of the illustrations and diagrams from the book and answers to the end of chapter questions Biochemistry will

become the textbook of choice for any brief biochemistry course Confirmed Adoptions Biochemistry is already the required text at the following institutions Becker College USA Bishop Burton College UK Bournemouth University UK Charles R Drew University of Medicine and Science USA Charleston Southern University USA Colorado State University Pueblo USA Idaho State University USA Liverpool John Moores University UK Montclair State University USA Newcastle University UK Rivier University USA Southeast Missouri State University USA Staffordshire University UK Stephen F Austin State University USA Texas Christian University USA The University of Texas at Austin USA Ume University Sweden University of Aberdeen UK University of Bradford UK University of Bedfordshire UK University of Brighton UK University of the Incarnate Word USA University of Kansas USA University of Miami Miller School of Medicine USA University of Nottingham UK University of Roehampton UK University of Salford UK University of the West of England UK University of Tulsa USA Valley City State University USA Yale University School of Medicine USA
