The Cannabis Health Index Uwe Blesching, 2015-12-01 This comprehensive sourcebook combines evidence based insights from more than 1 000 studies from cannabinoid and consciousness research to present a convincing case for the powerful healing effects of medical marijuana on over 100 chronic symptoms and diseases Written by a former paramedic with a PhD in alternative healthcare this in depth reference shows that the subtle shifts in awareness commonly observed in cannabis using patients vastly contribute to these compounds therapeutic potential *The Cannabis Health Index* is organized into condition specific chapters with eye catching ratings of cannabis efficacy for each symptom

along with recommendations for use and sidebars that suggest related mindfulness based practices that enhance the body's own ability to heal. Organized alphabetically from aging to wound care with sections on a variety of conditions including infections, cancer, cardiovascular health, eye diseases, inflammatory diseases, neurological diseases and much more, the Index reveals that the huge body of scientific studies focused on cannabis is a tremendously underutilized repository of knowledge. In synthesizing the findings of these studies, Blesching brings clarity to the process of making informed decisions about cannabis as a valid treatment. Informative, user-friendly and practical, *The Cannabis Health Index* presents striking evidence that cannabis is remarkably safe and effective when used within the proper therapeutic window, especially compared with the risks of managing chronic symptoms with pharmaceuticals. *Books In Print 2004-2005* Ed Bowker, Staff Bowker, Ed, 2004.

IC Diet Cookbook Arnold Kuntz Ph D, 2020-09. Interstitial cystitis in tur STISH ul sis TIE tis is a chronic condition causing bladder pressure, bladder pain and sometimes pelvic pain. The pain ranges from mild discomfort to severe pain. The condition is a part of a spectrum of diseases known as painful bladder syndrome. Your bladder is a hollow muscular organ that stores urine. The bladder expands until it's full and then signals your brain that it's time to urinate, communicating through the pelvic nerves. This creates the urge to urinate for most people. With interstitial cystitis, these signals get mixed up; you feel the need to urinate more often and with smaller volumes of urine than most people. Interstitial cystitis most often affects women and can have a long-lasting impact on quality of life. Although there's no cure, medications and other therapies may offer relief.
