

Solving Exponential and Logarithmic Equations

In section 3.4 you will learn to:

- Solve simple exponential and logarithmic equations.
- Solve more complex exponential and logarithmic equations.
- Use exponential and logarithmic equations to model and solve real-life problems.

An exponential equation has a variable in the exponent:

$$4^{x+1} = 16^{x-1}$$

To solve this one, make the bases alike.

Exponential functions are one-to-one, so when the bases are the same, the exponents are equal.
