Sound to Sense, Sense to Sound Pietro Polotti, 2008 Since the 1950s Sound and Music Computing SMC research has had a profound impact on the development of culture and technology in our post industrial society SMC research approaches the whole sound and music communication chain from a multidisciplinary point of view By combining scientific technological and artistic methodologies it aims at understanding modeling representing and producing sound and music using computational approaches This book by describing the state of the art in SMC research gives hints of future developments whose general purpose will be to bridge the semantic gap the hiatus that currently separates sound from sense and sense from sound

Sound Ideas Aden Evens, A highly original approach to the philosophy of musical experience *The Second Sense* Robin Maconie, 2002-05-07 In a visual culture hearing is the second sense and music is the art of hearing Kandinsky believed that music transcended painting and visual representation because it had the power to act directly and invisibly on the human spirit Because it is the only art to deal unequivocally with the real world of sound and its attendant perceptions of time motion and human mortality music remains a powerful and often controversial influence on human behavior Defining music in the broadest sense as any acoustic activity intended to influence the behavior of others and written in a clear conversational style for a non specialist readership *The Second Sense* draws on over 100 examples of recorded musical sources from throat singing to Beethoven and from traditional Japan to Boulez including a great many popular classics On the basis that Everything you hear is true true of yourself true of the music and true of the relationship between what you hear and how you hear it the author teases out the signs symbols and patterns of thought that arise from the way people hear the sounds people make and the instruments and environments that are designed and constructed to enhance the listening experience Maconie aims to do for music what Klee and Kandinsky did for art education and Marshall McLuhan for media studies *Literature: Structure, Sound, and Sense* Laurence Perrine, 1974 **Low-Frequency Sound and Marine**
