South African Metro Police 2014 Application Form:

Urban Informality in South Africa and Zimbabwe Inocent Moyo, Trynos Gumbo, 2021-01-09 This book adds to the research of urban informality in the Global South with a specific focus on South Africa and Zimbabwe. It addresses the agency and the potential transformative capacity of the phenomenon of urban informality in connection with Southern African cities and towns. It adopts a political economy approach to analyse the evolution of informality in cities and its implications for urban planning. It brings to bear how the South African and Zimbabwean historical and/or ideological and contemporary political and economic trajectories have impacted on the ever-changing nature of urban informality both spatially and structurally and/or compositionally, thus resulting in unique urban materialities which are aspects that have scarcely been studied or discussed in the extant literature. This book therefore seeks to close the academic gap by dealing with the dearth of literature on spatial re-locational discourses of urban informality. The work positions urban informality as a resilient force with potency in terms of political mobilisation and re-shaping urban spaces. Though these are fundamental issues, they have received comparatively little attention, especially in literature that focuses on the Southern African region. Accordingly, undergraduate and postgraduate students as well as academics in the fields of Urban Geography, Political Science, Development Studies, Sociology, Town and Regional Planning, among others, will find the range of topics and depth of coverage in this book particularly valuable. Similarly, practitioners and activists on issues of urban informality and urban governance will find the book very useful.

Police Work and Identity Andrew Faull, 2017-09-07 This is a book about the men and women who police contemporary South Africa. Drawing on rich original ethnographical data, it considers how officers make sense of their jobs and how they find meaning in their duties. It demonstrates that the dynamics that lead to police abuses and scandals in transitional and neo-liberalising regimes such as South Africa can be traced to the day-to-day experiences and ambitions of the average police officer. It is about the stories they tell themselves about themselves and their social worlds and how these shape the order they produce through their work. By focusing on police officers, this book positions the individual in primacy over the organisation, asking what policing looks like when motivated by the pursuit of ontological security in precarious contexts. It acknowledges but downplays the importance of police culture in determining officers' attitudes and behaviour and reminds readers that most officers' lives are entangled in and shaped by a range of social, political and cultural forces. It suggests that a job in the South African Police Service (SAPS) is primarily just that: a job. Most officers join the organisation after other dreams have slipped beyond reach, their presence in the Service being almost accidental. But once employed, they re-write their self-narratives and enact carefully choreographed performances to ease managerial and public pressure and to rationalize their coercive practices. In an era where evidence and what works reigns supreme and where cop culture is often deemed a primary socializing force, this book emphasises how officers' personal histories, ambitions and vulnerabilities remain central to how policing unfolds on the street.

Protest in South Africa Heidi Brooks, Rekgotsofetse Chikane, 2024-01-23 Popular protest has become a regular feature of post-1994 South Africa. As a young democracy born out of resistance, we may understand the contemporary manifestations of protest as extensions of this broader history. However, it is notably in the context of formal democratic institutions that popular protest has become an increasingly normalised mode of influencing policy, demanding service delivery, and forcing change. Protest is constitutive of South Africa's democratic politics but also reflective of it. *Protest in South Africa: Rejection, reassertion, reclamation* explores the underpinnings of contemporary protest and both its short-term causes and structural drivers. Focusing on the surge of protest from the mid-2000s, this edited volume provides an overview of the complexity of protest action, the diversity of protest spaces and actors, and responses to protest from both citizens and state. The volume situates its analysis against the backdrop of the global wave of protest witnessed since the turn of the 21st century while examining protest in South Africa's local and historical contexts. Contributors to the volume examine protests in relation to, among other factors, provision of infrastructure and services, contestations around socio-economic development issues of citizenship and demands for inclusive democratic governance. Chapters also examine the role of women in protest action, the policing of protest, and the intersection of protest action with spaces of formal politics. The volume also alerts us to the darker side of protest and the destruction and division it may foment. It thus considers the prospects of South Africa's evolving, sometimes violent, protest terrain for social and state stability and democratic progress. In the diversity of spaces, sectors, and communities of interests in which collective action has emerged, *Protest in South Africa: Rejection, reassertion, reclamation* shows how protest is underpinned by a rejection of the status quo, a reassertion of interests, and a reclaiming of the political and democratic space.

Identification and Citizenship in Africa Séverine Awenengo Dalberto, Richard Banégas, 2021-05-09 In the context of a global biometric turn this book investigates processes of legal identification in Africa from below asking what this means for the relationship between citizens and the state Almost half of the population of the African continent is thought to lack a legal identity and many states see biometric technology as a reliable and efficient solution to the problem However this book shows that biometrics far from securing identities and avoiding fraud or political distrust can even participate in reinforcing exclusion and polarizing debates on citizenship and national belonging It highlights the social and political embedding of legal identities and the resilience of the documentary state Drawing on empirical research conducted across 14 countries the book documents the processes practices and meanings of legal identification in Africa from the 1950s right up to the biometric boom Beyond the classic opposition between surveillance and recognition it demonstrates how analysing the social uses of IDs and tools of identification can give a fresh account of the state at work the practices of citizenship and the role of bureaucracy in the writing of the self in African societies This book will be of an important reference for students and scholars of African studies politics human security and anthropology and the sociology of the state
