Transnational Spaces and Identities in the Francophone World Hafid Gafa ti, Patricia M. E. Lorcin, David G. Troyansky, 2009-07-01 The dissolution of the French Empire and the ensuing rush of immigration have led to the formation of diasporas and immigrant cultures that have transformed French society and the immigrants themselves Transnational Spaces and Identities in the Francophone World examines the impact of this postcolonial immigration on identity in France and in the Francophone world which has encompassed parts of Africa the Middle East Southeast Asia and the Americas Immigrants bear cultural traditions within themselves transform host communities and are in turn transformed These migrations necessarily complicate ideals of national literature culture and history forcing a reexamination and a rearticulation of these ideals Exploring a variety of texts informed by these transnational conceptions of identity and space the contributors to this volume reveal the vitality of Francophone studies within a broad range of disciplines periods and settings They remind us that the idea and reality of Francophonie is not a late twentieth century phenomenon but something that grows out of long term interactions between colonizer and colonized and between peoples of different nationalities ethnicities and religions Truly interdisciplinary this collection engages conceptions of identity with respect to their physical geographic ethnic and imagined realities

Real and Imaginary Spaces in Tom Stoppard's Plays Nevin Gürbüz-Blaich, 2025-06-02 This study benefits from the terminology of geocriticism a literary criticism that suggests an interdisciplinary approach to the exploration of literature in relation to space and place and refers to the spatial theories of Lefebvre Foucault Bakhtin Aug and Certeau as well as to Issacharoff's study of dramatic space Proposing a multidisciplinary

perspective the book analyzes the mimetic and diegetic spaces in four of Tom Stoppard's plays *Rosencrantz and Guildenstern Are Dead* 1966 *Travesties* 1974 *Arcadia* 1993 and *Indian Ink* 1995 Stoppard's plays from the 1960s to the 2000s portray different spaces including urban spaces cities landscapes rooms and fictional sites thus serving as exceptional textual sources in spatial literary studies *The British on Holiday* Hazel Andrews, 2017-01-01 Only added for successful withdrawal

From City Space to Cyberspace Amanda Wasielewski, 2025-10-01 The narrative of the birth of internet culture often focuses on the achievements of American entrepreneurs in Silicon Valley but there is an alternative history of internet pioneers in Europe who developed their own model of network culture in the early 1990s Drawing from their experiences in the leftist and anarchist movements of the 80s they built DIY networks that give us a glimpse into what internet culture could have been if it were in the hands of squatters hackers punks artists and activists In the Dutch scene the early internet was intimately tied to the aesthetics and politics of squatting Untethered from profit motives these artists and activists aimed to create a decentralized tool that would democratize culture and promote open and free exchange of information Living Law Sandro Chignola, 2024-07-12 This book offers a radical new understanding of law beyond the confines of its formalization by the state The book takes off from the late work of Gilles Deleuze and Michel Foucault for whom law and its institutions came to be liberated from an ideological perspective that had treated them as sterile instruments for the reproduction of domination Engaging its continental history it addresses the concept of law not merely as a command but as the result of a much more complex legal operation aimed at dynamically stabilizing the social relations of a community The book thus sidesteps the usual legal political focus on those from Hobbes to Schmitt who have contributed to the categorical scheme of the modern state and with it questions of political representation sovereignty the rigid distinction between public law and private law and so on as it pursues an alternative theoretical trajectory through Ravaissou Tarde and Hauriou Politics the book maintains can no longer be treated simply through the state form And relatedly the law must be seen as a living law a law that cannot be treated exclusively in formal terms but must be taken as a grammar capable of articulating a politics of process relationality and innovation Reconceived as such law can then circumvent the aporias that arise when society is viewed as a private company and the state seen as the bearer of the only possible means of formalizing its relationships At the intersection of law and political theory this book will speak to scholars and others with interests in both these areas and especially those concerned with the limits of both conventional and critical approaches to law **British Bee Journal, and Bee Keeper's Adviser**, 1883 British Bee Journal & Bee-keepers Adviser, 1883 **Les Transformateurs**

Duchamp/Duchamp's TRANS/formers Jean-François Lyotard, 2010 This collection of essays written between 1974 and 1977 in the midst of Duchamp's rediscovery in France was published by Editions Galilée Paris in 1977 and in English translation by the Lapis Press Los Angeles in 1990 **English Mechanic and World of Science**, 1873 *Mathematical Reviews*, 2005-06 **Principia Amoris** John Mordechai Gottman, 2014-10-10 Stereotypically science and emotion are

diametric opposites one is cold and unfeeling the other soft and nebulous one is based on proven facts while the other is based on inexplicable feelings and never the twain shall meet until now John Gottman delves into the unquantifiable realm of love armed with science and logic and emerges with the knowledge that relationships can be not only understood but also predicted as well Based on research done at his Love Lab and other laboratories Gottman has discovered that the future of love relationships can be predicted with a startling 91% success rate These predictions can help couples to prevent disasters in their relationships recognize the signs of a promising relationship and perhaps more importantly recognize the signs of a doomed one Principia Amoris also introduces Love Equations a mathematical modeling of relationships that helps understand predictions Love Equations are powerful tools that can prevent relationship distress and heal ailing relationships Readers learn about the various research and studies that were done to discover the science behind love and are treated to a history of the people ideas and events that shaped our current understanding They also learn about The Four Horsemen of the Apocalypse 45 natural principles of love 5 couple types 5 recipes for good relationships And much more Just as science helped us to understand the physical world it is helping us to understand the emotional world as well Using the insights in this book mental health professionals can meaningfully help their distressed clients as well as better understand why a relationship is failing or succeeding Appropriate for the curious non mental health professional as well Principia Amoris is a must have on any bookshelf
