#### When Should I Start Studying

It is never too early to start studying for the SAT II Chemistry test. The earlier you begin the more time you will have to sharpen your skills. Do not procrastinate. The sooner you learn the format of the exam, the more comfortable you will be when you take the exam.

#### FORMAT OF THE SAT II CHEMISTRY

The SAT II Chemistry is a one hour exam consisting of 85 multiple choice questions. The first part of the exam consists of classification questions. This question type presents a list of statements or questions that you must match up with a group of choices lettered A through E. Each choice may be used once, more than once, or not at all. The exam then shifts to relationship analysis questions which you will answer in a specially numbered section of your answer sheet. You will have to determine if each of two statements is true or false and if the second statement is a correct explanation of the first. The last section is composed strictly of multiple choice questions with choices lettered A through E.
