These areas of investigation have previously been largely studied from the narrow perspective of location unduly focusing on comparative advantages of distance while neglecting the influence of forces such as technology ideology and the power of mental mapping in spatial decision making This volume puts

forward the argument that the harmonious relationship between states and efficient exploitation of the blue economy ecosystem in ways that promote peace between states lies not only in the structural transformation of markets but also in bridging the spatial and social divide between the coastal and hinterland societies. Thus this work proffers possibilities for a holistic regime for managing Africa's coastal hinterland continuum through innovative strategies such as SMART blue economies and the infusion of the geopolitical dimension into the management of maritime and territorial diplomacy The combination of theoretical and empirical analysis buttressed by in depth case studies of what works in the management of blue economy ecosystem and what does not work make this volume ideal for researchers students and practitioners interested in African regional studies African political economy political geography strategic military studies governance of seas and oceans and maritime science diplomacy ECCWS2016-Proceedings fo the 15th European Conference on Cyber Warfare and Security "Robert Koch, Gabi Rodosek, 2016-06-15 These proceedings represent the work of researchers participating in the 15th European Conference on Cyber Warfare and Security ECCWS 2016 which is being hosted this year by the Universitat der Bundeswehr Munich Germany on the 7 8 July 2016 ECCWS is a recognised event on the International research conferences calendar and provides a valuable plat form for individuals to present their research findings display their work in progress and discuss conceptual and empirical advances in the area of Cyberwar and Cyber Security It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and ex panding range of Cyberwar and Cyber Security research available to them With an initial submission of 110 abstracts after the double blind peer review process there are 37 Academic research papers and 11 PhD research papers 1 Master's research paper 2 Work In Progress papers and 2 non academic papers published in these Conference Proceedings These papers come from many different coun tries including Austria Belgium Canada Czech Republic Finland France Germany Greece Hungary Ireland Kenya Luxembourg Netherlands Norway Portugal Romania Russia Slovenia South Africa Sweden Turkey UK and USA This is not only highlighting the international character of the conference but is also promising very interesting discussions based on the broad treasure trove of experience of our community and partici pants

Norman Friedman, 2012-10-22 A comprehensive survey of the design history and development of the Royal Navy s greyhounds of the sea WARSHIPS Magazine Since World War II the old categories of destroyer and frigate have tended to merge a process that this book traces back to the radically different Tribal class destroyers of 1936 It deals with the development of all the modern destroyer classes that fought the war looks at the emergency programs that produced vast numbers of trade protection vessels sloops corvettes and frigates then analyzes the pressures that shaped the post war fleet and continued to dominate design down to recent years Written by America's leading authority and featuring photos and ship plans it is an objective but sympathetic view of the difficult economic and political environment in which British designers had to work and benefits from the author's ability to compare and contrast the US Navy's experience Norman Friedman is renowned for his ability to explain the policy and strategy changes that drive design decisions and his latest book uses previously unpublished material to draw a new and convincing picture of British naval policy over the previous seventy years and more Includes photos Security in Nigeria Caroline Varin, Freedom Onuoha, 2020-07-23 Nigeria is the most dynamic country on the African continent Yet the legacy of colonialism deep rooted corruption exposure to climate change and the proliferation of small arms have created a precarious security situation that holds back the country's potential for peace and prosperity Security in Nigeria explores the many security threats facing Nigeria and assesses the government's responses to date With contributors spanning three continents it provides an original and comprehensive analysis of old and new security threats and offers original solutions to address the crisis The Eastern Fleet and the Indian Ocean, 1942-1944 Charles Stephenson, 2022-04-06 A study of the British Royal Navy's activities in the Indian Ocean during World War II led by Admiral Sir James Somerville The story of the British Eastern Fleet which operated in the Indian Ocean against Japan has rarely been told Although it was the largest fleet deployed by the Royal Navy prior to 1945 and played a vital part in the theatre it was sent to protect it has no place in the popular consciousness of the naval history of the Second World War So Charles Stephenson's deeply researched and absorbing narrative gives this forgotten fleet the recognition it deserves British pre war naval planning for the Far East is part of the story as is the disastrous loss of the battleship Prince of Wales and battlecruiser Repulse in 1941 but the body of the book focuses on the new fleet commanded by Admiral Sir James Somerville and its operations against the Japanese navy and aircraft as well as Japanese and German submarines Later in the war once the fleet had been reinforced with an American aircraft carrier it was strong enough to take more aggressive actions against the Japanese and these are described in vivid detail Charles Stephenson's authoritative study should appeal to readers who have a special interest in the war with Japan in naval history more generally and Royal Navy in particular Praise for The Eastern Fleet and the Indian Ocean 1942 1944 This meticulously researched outstandingly clear well written and absorbing account is long overdue and will most likely become a standard work The text is most helpfully supported by over 80 pages of detailed end notes referenced to each chapter and a detailed index This is not only a book for naval historians but also for

anyone with an interest in the War in the Indian Ocean region Highly recommended Military Historical Society I enjoyed this book it gives us an account of an often neglected part of the war at sea and of the achievements of Admiral Somerville who kept his fleet intact in the face of a potentially overwhelming opponent then was willing to acknowledge that his fleet needed to improve massively before it could take on the Japanese Dr John Rickard author and webmaster of the Military History Encyclopedia on the Web Air Power in the Indian Ocean and the Western Pacific Howard M. Hensel, 2020-06-04 This book examines the security dynamics of the Indian Ocean and the Western Pacific concentrating upon an analysis and evaluation of the air power capabilities of the various powers active in the two regions.
