NGOs at the Table Mari Fitzduff, Cheyanne Church, 2004-04-02. The number of NGOs working in the area of conflict has increased dramatically over the last few decades and they are fast becoming a vital component of both local and international responses to conflicts. As their influence rises, many seek to more effectively impact the policy-making and program development of governments and intergovernmental organizations. NGOs at the Table explores such challenges by examining a number of NGOs diverse in size, location and financial means that have successfully influenced both policy and program development in conflicts throughout the world. It explores

why these organizations decided to embark upon a strategic campaign to influence the policy making process as well as outlines the issues addressed and the tactics used It examines the constraints faced in trying to penetrate the governmental process and discusses how these obstacles were overcome The book also includes analysis and reflections by a variety of experienced policy makers and academics working in the field A unique and much needed resource for NGOs wishing to extend their own capacities in the field of policy making this book will prove valuable for any policy maker wishing to take advantage of the unique capacities that NGOs contribute to the field of conflict prevention management and resolution

time in a democratic election In a time of recall and reflection it is important to take account not only of the dramatic events that grip the headlines but also of other signposts that indicate the shape and characteristics of a society The New South African Review looks every year at some of these signposts and the essays in this fourth volume of the series again examine and analyse a broad spectrum of issues affecting the country They tackle topics as diverse as the state of organised labour food retailing electricity generation access to information civil courage the school system and looking outside the country to its place in the world South Africa s relationships with north east Asia with Israel and with its neighbours in the southern African region Taken together these essays give a multidimensional perspective on South Africa s democracy as it turns twenty and will be of interest to general readers while being particularly useful to students and researchers

Democratization of Intelligence Peter Gill, Michael Andregg, 2017-10-02 This comparative analysis of the sometimes fraught process of achieving democratic governance of security intelligence agencies presents material from countries other than those normally featured in the Intelligence Studies literature of North America and Europe Some of the countries examined are former Communist countries and several in Latin America are former military regimes Others have been democratic for a long time but still experience widespread political violence Through a mix of single country and comparative studies major aspects of intelligence are considered including the legacy of and transition from authoritarianism the difficulties of achieving genuine reform and the apparent inevitability of periodic scandals Authors consider a range of methodological approaches to the study of intelligence and the challenges of analysing the secret world Finally consideration is given to the success or otherwise of intelligence reform and the effectiveness of democratic institutions of control and oversight This book was originally published as a special issue of *Intelligence and National Security*
