Soviet Tanks and Combat Vehicles Steve Zaloga, James W. Loop, 1987 The Illustrated London News, 1927 *Russian Tanks and Armored Vehicles, 1946 to the Present* Fred Koch, 1999 After World War II Russian tank development continued to strive for dominance on numerous fronts This book accounts for all of the Russian and USSR armored vehicles developed just prior to the end of the Second World War to the present Each models specifications and data as well as developmental history are given in comprehensive text and numerous photos of striking detail This book is a superb reference for historians and modellers **Soviet Tanks and Combat Vehicles of World War Two** Steve Zaloga, James Grandsen, 1984 Indhold Soviet Armour of the Great Patriotic War 1941 to 1945 bl a med kapitler om Soviet tank design on the eve of war Organization of the Soviet Armoured Force The summer catastrophe The T 34 medium tank Light tanks Tank unit organization The KV heavy tank Mechanized artillery development Katyusha rocket launchers The SU 76 light mechanized gun The SU 122 medium mechanized gun The KV 7 mechanized gun Mechanized artillery units The German response Tank destroyers The Battle of Kursk Orel The T 34 85 medium tank The IS 2 heavy tank Heavy assault gun Light mechanized guns Tank destroyers of 1944 The T 44 medium tank The K 90 amphibious tank Light fighting vehicles Airborne fighting vehicles Engineer tanks Flame thrower tanks Armoured recovery vehicles Bridging tanks Anti aircraft vehicles Artillery transporters Armoured trains Lend lease tanks Lend lease armoured vehicles supplied to the Soviet Army Soviet tanks in retrospect Desuden er der oversigt over produktionen af sovjetiske kampvogne under krigen og Soviet Armoured Corps Order of Battle 1942 1945 **Red Steel** Russell Phillips, 2013-04 The Cold War never heated up but if it had the Soviet Union was ready This reference work details 73 major Soviet war machines from the 2P26 Baby Carriage a deceptively light Jeep like vehicle mounting four anti tank missiles to the T 80U main battle tank with its advanced armour and electronic countermeasures Sixty one photographs and drawings illustrate the work and access to a web gallery with even more illustrations is included in the purchase **Tanks of the USSR, 1917-1945** Alexander Ludeke, 2017-11-30 The Soviet Union had already begun building an armored industry as early as the 1920s Although initially limited to reconstructing and developing Western European armored vehicles an independent line of powerful and easy to produce models had been established by 1939 Even after the Second World War the USSR expanded its armament force considerably even planning to cross western Europe in a massive armoured wave in the event of any conflict with NATO In this book Alexander Ldeke looks at all the important Soviet tanks that were built from 1917 up until the end of the Second World War **Tanks and Combat Vehicles of the Warsaw Pact** Russell Phillips, 2017-08-22 When East and West survived on a knife edge between peace and war both sides were busy preparing themselves for military action But what exactly would NATO s troops have faced if the Cold War had suddenly turned hot Tanks and Combat Vehicles of the Warsaw Pact is a fascinating reference book looking at the wide variety of

combat vehicles which were poised and ready for action throughout the long years of military stand off Led by the Soviet Union the nations which formed the Warsaw Pact were as innovative as they were prepared and these deadly war machines had the potential to change the course of world history forever Find out more about these combat vehicles from how they worked to what they would have been capable of if they had been used in military action against NATO Tanks and Combat Vehicles of the Warsaw Pact details more than 100 military vehicles from the 2P26 Baby Carriage a compact Soviet off road vehicle mounted with anti tank missiles to the T 80U main battle tank in service from 1985 onwards *Russian and Soviet Tanks 1914-1941* Maximino Argüelles Martinez,2014-02-17 About the evolution of the Soviet offensive doctrine during World War II Where did this doctrine and armored formations that takes practice arise Why was the USSR as a nation which in 1940 developed a tank as advanced as the T 34 100 pages trying to answer these and other questions with a description of the principal armored vehicles and the formations in which were integrated from its beginnings in the Russian Empire until June 22 1941 *Modern Soviet Armour* Steve Zaloga,1979 *Soviet Cold War Weaponry* Anthony Tucker-Jones,2015

Modern Soviet Armor Steve Zaloga,1979 **Soviet Cold War Weaponry** Anthony Tucker-Jones,2015-05-20 The T 54 T 62 and T 72 main battle tanks along with the personnel carriers assault guns self propelled guns and anti tank missiles that are illustrated in this photographic history represent the high point in the design and manufacture of armoured vehicles by the Soviet Union during the Cold War Although the superpowers never came to blows the Cold War was far from cold as numerous hot proxy wars were fought in Africa and the Middle East and these conflicts employed the Soviet weaponry that is shown in action in the colour and black and white photographs selected for this book Between the 1950s and 1980s Soviet and Warsaw Pact countries produced thousands of tanks and armoured vehicles ready for the Third World War They embarked on a technological arms race with the NATO allies in an attempt to counter each new piece of equipment as it appeared in service Much of this Soviet weaponry has achieved almost iconic status and despite its age remains in service with armies guerrilla forces and terrorist organizations around the world today It is also of enduring interest to collectors re enactors and modellers who are fascinated by the military equipment of the late twentieth century *Russian Tanks and Armored Fighting Vehicles, 1917-1945* Wolfgang Fleischer,1999 This book describes in excellent detail and striking photos many unpublished the development and amassing of Russias armored vehicles from World War I through World War II Included in this text are those models that did not make it to production and also the history behind Russias tank development including the numerous foreign models that it based its designs on This book is a superb reference for historians and modellers *Red Army Auxiliary Armoured Vehicles, 1930-1945* Alexey Tarasov,2021-07-07 During the 1930s in the Soviet Union a remarkable range of auxiliary armoured vehicles were produced for the Red Army which have rarely had the attention they deserve and Alexey Tarasov s photographic history is the ideal guide to them These innovative designs demonstrate the diversity and innovation of the Soviet arms industry Among them were armoured flails ambulances

bridge layers flame throwers and amphibious cars which prefigure similar designs made by western engineers during the Second World War As this selection of rare photographs shows Soviet designers were in many ways ahead of their time and it was short sighted internal policy and the shortcomings of Soviet industry which led to the cancellation or postponement of many of these promising projects As a result when faced with Operation Barbarossa in 1941 the Red Army lacked the auxiliary armour that would have helped to stem the German advance Alexey Tarasov s in depth research and the rare photographs he has assembled give a fascinating insight into a little known aspect of the history of Soviet armoured vehicles

Tanks of the USSR 1917-1945 Alexander Ludeke,2018-01-23 The Soviet Union had already begun building an armored industry as early as the 1920s Although initially limited to reconstructing and developing Western European armored vehicles an independent line of powerful and easy to produce models had been established by 1939 Even after the Second World War the USSR expanded its armament force considerably even planning to cross western Europe in a massive armored wave in the event of any conflict with NATO In this book Alexander L deke looks at all the important Soviet tanks that were built from 1917 up until the end of the Second World War

Russian Tanks of World War II Tim Bean,Will Fowler,2002 At the start of the campaign on the Eastern Front in the earliest days of Operation Barbarossa it was the German armour that swept all in front of it as the Wehrmacht drove eastwards in an unrelenting advance on Leningrad Moscow and Stalingrad The ill prepared and under resourced Russian forces were forced to retreat Gradually the balance of the war swung in favour of the Russian forces whose strength both in numbers and equipment proved decisive in the ultimate defeat of the German forces in the east Critical in the Soviet victory was its armour tanks such as the T 34 proving the equal if not better than some of the tanks available to the Germans This authoritative history of the Soviet forces before and during World War 2 reveals the development of their tactics in the early post revolutionary era right through to the ultimate victory in Berlin in May 1945 The dramatic struggle of the tank crews against the German advance is told through some 200 contemporary photographs many of which have never been seen before The photographs include images of tank training in the 1920s and 1930s on active service and many compelling pictures from some of the major tank battles of the day Over the past five years aided by the opening up of archives in Russia previously closed to western experts there has been a massive growth in interest in the events that occurred on the Eastern Front Russian Tanks is an important addition to the literature currently available exploring as it does the vitally important Soviet armour of the period

US Cold War Tanks and Armoured Fighting Vehicles Michael Green,2020-11-12 This expert study of the U S military s armored vehicles deployed during the Cold War features rare photographs from the wartime archives To counter the Soviet threat and that of their client States during the Cold War years 1949 1991 the American military deployed an impressive range of main battle tanks and armored fighting vehicles Expert author Michael Green presents a detailed study of these vehicles and their variants in this informative volume of stunning wartime photographs The Patton series of medium main battle tanks including the M46 M47

and M48 supplemented by the M103s Heavy Tank initially formed the core of the US tank fleet In 1960 the M60 MBT entered service and in turn was replaced by the M1 Abrams in 1980 In support were armored reconnaissance vehicles progressively the M41 bull dog 1951 the M114 1961 the M551 Sheridan 1967 and M3 Bradley Cavalry Fighting Vehicle 1981 The armored personnel carrier range included the ubiquitous M113 and its replacement the M2 Bradley cousin of the M3 All of these vehicles are covered in this highly detailed volume in the Images of War series Soviet Tank Company Tactics Defense Intelligence Agency,2019-07-25 Soviet Tank Company Tactics May 1976 We were surprised to find there were no clean copies in print so we decided to reconstitute the report as best we could Unfortunately the photos are not very good and the originals are nowhere to be found so we did not replace them Rather than change the document we decided to add a new document at the end that would show current 2019 Russian tanks and include what little information is available As far as tactics go not really sure how the new tanks such as the T 14 will cause changes to Russian tank tactics but some of the information is still valid today such as the use of snorkel night vision and the effects of poor weather conditions You will note that we added some additional information regarding Russian New Generation Warfare RNGW 4th Generation Warfare Hybrid War and new Russian weapons at the end including 1K17 Szhatie 1 17 Russian Stiletto Laser Tank Combat Laser System Peresvet Russian Laser Cannon T 14 Armata Main Battle Tank T 15 Heavy Infantry Combat Vehicle Kurganets 25 Light Tracked Armored Vehicle 2S35 Koalitsiya SV 152 mm Self Propelled Howitzer VPK 7829 Bumerang Modular Infantry Wheeled Fighting Vehicle Why buy a book you can download for free We print the paperback book so you don t have to First you gotta find a good clean legible copy and make sure it s the latest version not always easy Some documents found on the web are missing some pages or the image quality is so poor they are difficult to read If you find a good copy you could print it using a network printer you share with 100 other people typically its either out of paper or toner If it s just a 10 page document no problem but if it s 250 pages you will need to punch 3 holes in all those pages and put it in a 3 ring binder Takes at least an hour It s much more cost effective to just order the bound paperback from Amazon com This book includes original commentary which is copyright material Note that government documents are in the public domain We print these paperbacks as a service so you don t have to The books are compact tightly bound paperback full size 8 1 2 by 11 inches with large text and glossy covers 4th Watch Publishing Co is a HUBZONE SDVOSB <https://usgovpub.com>
