

Secure Services Gateway 140

Getting Started

Use the instructions in this guide to help you connect your Secure Services Gateway (SSG) 140 device to your network. For additional configuration information, see the *SSG 140 Hardware Installation and Configuration Guide*.

CONNECTING THE DEVICE

Use the network diagram above and the instructions below to connect and set up the SSG 140 device to protect your network. Use the LEDs on the front panel of the device to help you determine its status.

Step 1

Connect the workstation to the device using either of the following methods:

- Connect an Ethernet cable from the Trunked port labeled 0/0 to the Ethernet port on the workstation. (We recommend this connection method.)
- Connect a straight-through serial cable from the console port to the supplied DB-9 adapter which then connects to the serial port on the workstation.

Step 2

Connect the power cable between the device and a power source. (We recommend using a surge protector.) Confirm that the following LEDs are working correctly:

- a. Ensure that the POWER LED glows green. This indicates that the device is receiving power.
- b. After the device starts (about one minute), ensure that the STATUS LED blinks green. This indicates that the device is operating normally.

- c. Ensure that the Link Activity LEDs glow green for the connected Ethernet ports. This indicates that the Ethernet ports were detected.

Step 3

Configure the workstation to access the device through a browser:

- a. Ensure that your workstation is properly connected to the device using one of the methods presented in step 1.
- b. Change the TCP/IP settings of your workstation to obtain its IP address automatically from the device using DHCP. For help, see the operating system documentation for your workstation.

Note: Ensure that your internal network does not already have a DHCP server.

- c. If necessary, restart your workstation to enable the changes to take effect.

You can use the Initial Configuration Wizard (ICW) to configure the SSG 140 device. Before starting the ICW, you need to decide how you want to display your device. (For additional information, see the *SSG 140 Hardware Installation and Configuration Guide*.)
