

Stationary Mode Speed Measurement

Perform the tuning fork test on the radar before using for traffic measurements. See page 20 for instructions on this procedure.

Select stationary mode by pressing the **MOV/STA** key on the remote control, then select the desired antenna by pressing the **ANT** key. To transmit, press the **XMIT/HOLD** key. The **XMIT** icon should appear on the display unit (Fig 3) indicating that a radar signal is being transmitted.

If a target is in range, such as one traveling 54 mph, the speed will appear in the target window of the display unit (Fig 4); and a Doppler audio tone, which is proportional to the target speed, will be heard from the speaker. The target speed is continually measured and displayed, and the Doppler audio tone is heard as long as the target is present.

Hold mode can be selected by pressing the **XMIT/HOLD** key on the remote control. In hold mode, The **XMIT** icon will be off (Fig 5) and no signal will be transmitted, preventing detection by radar detectors.

NOTE: While operating in **VSS** mode (see section titled “**VSS OPTION**” on Page 21) the radar uses the presence (or absence) of **VSS** pulses to automatically switch between moving mode and stationary mode.

Opposite Lane Moving Mode Speed Measurement

Perform the tuning fork test on the radar before using for traffic measurements. See page 20 for instructions on this procedure.

Select moving mode by pressing the **MOV/STA** key on the remote control. When **STALKER PATROL** is in moving mode, the patrol window will contain either the patrol speed or a **| |**. The **| |** (Fig 6) indicates that **STALKER PATROL** is in moving mode, but has no ground speed. Select opposite lane mode by pressing the **SAME/OPP** key until the **SAME** icon is not visible. To transmit, press the **XMIT/HOLD** key. The **XMIT** icon should appear on the display unit (Fig 6) indicating that a radar signal is being transmitted. Be sure the patrol speed indicated corresponds to the speedometer of the patrol vehicle. If an approaching target is in the radar beam, its speed will appear in the target window and a Doppler audio tone will be heard from the speaker. Fig 7 is an example in which the patrol speed is 50 and the approaching target speed is 68. The target speed is continually measured and displayed and the Doppler audio tone is heard while the **STALKER PATROL** is in transmit mode and a target is present.
