response from business to social and environmental issues during the past decade has created a corporate responsibility movement. But what has been the impact of this movement? The financial crisis that began in 2007 has led more and more people to question the fundamentals of our economic system. Now some within the corporate responsibility movement are developing a vision and practice of a new form of capitalism, one that will require collective action to achieve. Bendell and Doyle draw on Lifeworth's annual reviews of corporate responsibility and explain how business leaders, stakeholders, and related academe now need to experiment with new models that address the fundamental flaws of contemporary capitalism, including monetary systems, enterprise ownership, and regulation. This book will be a fantastic resource for business libraries as it records and analyses key events, issues, and trends in corporate responsibility during the first decade of the 21st century. It is a sequel and companion to Bendell's previous work, *The Corporate Responsibility Movement*.

Ethical Principles and Economic Transformation - A Buddhist Approach Laszlo Zsolnai, 2011-05-17 Buddhism points out that emphasizing individuality and promoting the greatest fulfillment of the desires of the individual conjointly lead to destruction. The book promotes the basic value choices of Buddhism, namely happiness, peace, and permanence. Happiness research convincingly shows that not material wealth but the richness of personal relationships determines happiness. Not things but people make people happy. Western economics tries to provide people with happiness by supplying enormous quantities of things, and today's dominating business models are based on and cultivate narrow self-centeredness. But what people need are caring relationships and generosity. Buddhist economics makes these values accessible by direct provision. Peace can be achieved in nonviolent ways. Wanting less can substantially contribute to this endeavor and make it happen more easily. Permanence or ecological sustainability requires a drastic cutback in the present level of consumption and production globally. This reduction should not be an inconvenient exercise of self-sacrifice. In the noble ethos of reducing suffering, it can be a positive development path for humanity.
