Economics of Aquaculture Diversification in Indian Sundarban Jaydev Misra, 2018-01-01 Indian Sundarban is blessed with adequate diversity of Small Indigenous Fish Species SIFS. It is usually believed that integration of those species in the form of commercial culture along with present carp based production system can increase the overall efficiency of aquaculture production on the one hand as well as can provide food and nutritional security to the poor fish farmers on the other. But despite all efforts and enormous potentials the production level and productivity are still not adequate to meet the large gap between potential and actual yields of fish. In the present book attempts have been made to locate the efforts of aquaculture diversification and its effect on efficiency of overall fish production in Sundarban on more secure foundation of data and methodology. In this study based on primary survey attempts have been made to examine the structural and operational features of diversified aquaculture practices and to identify the factors which impede the development of fisheries in Indian Sundarbans. Governance and Policy Transformations in Central Banking Ahmed, Farhan, Khan, Raza Ali, 2024-02-07 In central banking the need for effective governance and policy transformations has never been more pressing. Central banks serve as the bedrock of a nation's financial stability and yet they face an array of complex challenges in the modern era. The delicate balance between autonomy from government influence and the necessity of adapting to external economic forces has become increasingly elusive. As the world grapples with the aftermath of a global pandemic and persistent economic turbulence the demand for innovative strategies to safeguard economic and financial stability has reached a crescendo. Central bankers, economists and policy experts are left grappling with the daunting task of navigating these treacherous waters in dire need of a compass to guide them toward a resilient future. *Governance and Policy Transformations in Central Banking* is a groundbreaking book that transcends traditional boundaries to offer a comprehensive solution to the complex challenges faced by central banks worldwide. This book not only diagnoses problems it also presents a meticulously curated collection of new empirical and theoretical chapters that illuminate the path forward. It is an invaluable resource that empowers central banks with the knowledge and tools necessary for development governance and policy transformation. Regional Development And Economic Growth In China Yanrui Wu, 2013-04-24 China has enjoyed unprecedented high economic growth for three decades. This growth has however been unbalanced and has led to some serious consequences which Chinese policy makers are now trying to rectify. One of the consequences is the deterioration of regional disparity which is threatening the stability of the Chinese society and hence the sustainability of current high economic growth in the country. This edited volume on China's regional development and economic growth is hence timely and contains a collection of the latest research reports in this field. The authors represent a distinguished group of economists in Australia, China, Japan and Vietnam who are actively engaged in research of the Chinese economy. The topics addressed in the chapters cover important regional issues.

such as inequality distribution of the creative class FDI and industrial policies Specifically this volume aims to examine selected issues associated with China s regional development economic growth and FDI and China and its neighboring economies The findings will contribute to current economic policy debates

Nomadic Modernisms and Diasporic Journeys of Djuna Barnes and Jane Bowles Pavlina Radia,2016-09-07 This book traces the artistic trajectories of Djuna Barnes and Jane Bowles examining their literary representations of the nomadic ethic pervading the twentieth century expatriate movements in and out of America The book argues that these authors contribute to the nomadic aesthetic of American modernism its pastoral ideographies post colonial ecologies as well as regional and transcultural varieties Mapping the pastoral moment in different temporalities and spaces Barnes representing the 1920s expatriation in Europe while Bowles comments on the 1940s exodus to Mexico and North Africa this book suggests that Barnes and Bowles counter the critical trend associating American modernity primarily with urban spaces and instead locate the nomadic thrust of their times in the post colonial history of the American frontier
