Industry Experts Share Their Insider Secrets, Experience and Advice on Healing Alireza Sharifi, Mohd Zaher Mohd Zain, 2019-10-25 Go on an incredible spiritual journey in this eye opening book that explores the body's incredible ability to heal itself ANXIETY AND STRESS are epidemic in today's fast paced world In response many turn to different types of healing and related practices with long term success with our authors Dr Alireza Sharifi Magda Amin Ryan Longenecker Maggie Guo Shirin Ariff Annette Nolan Coach Fareen Carolynn Tersigni Ambreen Ihsanullah Shohreh Bashar Ayesha Khalid Dr Roya F Komeili When we receive a diagnosis from medical professionals we are often so overwhelmed that we give up power over our own health and well being But the truth is we have more control over our health and life than we have been led to believe and that belief is at the core of our body's capacity to heal itself By identifying the emotional roots of illnesses we can tap into the body's healing powers and discover that although healing can be complex and deeply personal it can also happen spontaneously in a moment Heal shows us that science and spirituality are united and demonstrates that our thoughts beliefs and emotions have a huge impact on our overall health and the ability to recover from illness and injury This book offers many alternative modalities that have worked well for thousands of years but can't counter the effects of life in the twenty first century Instead you need a new approach to control anxiety especially given the proven connection between stress and serious diseases including cancer caused by a dysfunctional immune system It's a modern and stressful world We need a modern way to transform anxiety into vital energy These authors offer the ways

Post-Truth Geographies Barney Warf, 2023-09-05 This book explores the geographical dimensions and implications of the post truth era Opening with a defense of the Enlightenment and the continued significance of science objectivity and truth it then provides three key perspectives on the concept The first is a philosophical analysis of post truth Social theory in various forms has sutured knowledge and power in the process relativizing the nature of truth This process reaches its apogee under post modernism which questions the very nature of truth itself The second is the examination of the historical origins and development of the post truth world While post truth has a history that can be traced back to the 18th and 19th centuries more recently it has growth prolifically through the use of social media The book examines post truth as it appears in the yellow journalism of the Hearst newspapers Holocaust denial and contemporary attacks on science itself e.g the anti vaccine movement denial of evolution Post truth becomes a central issue in Western politics following Brexit and the election of Donald Trump who uses it frequently to advance a reactionary political agenda Russian hackers weaponize it to interfere in the politics of Europe and the U S Fox News and other right wing outlets also play a central role One result is the proliferation of unfounded conspiracy theories such as QAnon Today autocrats and dictators the world over use fake news to maintain their power Finally this book links the rise of a post truth society to the dynamics of contemporary economic geography Knowledge intensive capitalism has greatly elevated the significance of symbolic workers or the creative class Geographically contemporary capitalism has

accentuated the agglomeration of producer services in large urban areas in which such workers labor Conversely rural areas and small towns have largely become repositories of the undereducated and thus are more susceptible to fake news **101**
