acknowledgement *Domestic Commerce*, 1943 **Weapons and Warfare** Spencer C. Tucker, 2020-03-26 This work covers major weapons throughout human history beginning with clubs and maces through crossbows swords and gunpowder up to the hypersonic railgun lasers and robotic weapons under development today *Weapons and Warfare* is designed to provide students with a comprehensive and highly informative overview of weapons and their impact on the course of human history In addition to providing basic factual information this encyclopedia will delve into the greater historical context and significance of each weapon The chronological organization by time period will enable readers to fully understand the evolution of weapons throughout history The work begins with a foreword by a top scholar and a detailed introductory essay

by the editor that provides an illuminating historical overview of weapons. It then offers entries on more than 650 individual weapons systems. Each entry has sources for further reading. The weapons are presented alphabetically within six time periods ranging from the prehistoric and ancient periods to the contemporary period. Each period has its own introduction that treats the major trends occurring in that era. In addition, 50 sidebars offer fascinating facts on various weapons. Numerous illustrations throughout the text are also included.

World War II in Europe David T. Zabecki, 2015-05-01 World War II defined the 20th century and shaped many events from the decolonization of Africa to the rise and fall of the Berlin Wall. This encyclopedia offers a focused overview of this complex and volatile era: the circumstances that led up to war, the underlying causes, its unfolding and consequences. Organized for quick and precise access, more than 1300 entries by 150 experts are arranged in six sections for easy reference and consultation. All the key ideas, events, actions, weapons, individuals, and organizations that played vital roles in the war are covered from the Axis Pact to the Arab League, from the OSS to the Africa Corps, from the Chetniks to the Jedburghs, from the battle of Kursk to Operation Mincemeat, from Bill Donovan to Otto Skorzeny, from Gestapo to SMERSH, from Georgi Zhukov to Jean Leclerc, from the 88 gun to the Norden Bombsight. Covers important neglected subjects. The Encyclopedia puts special emphasis on the often neglected operations in Eastern Europe and Russia. A key section inspects and rates all the major weapons with handy tables for easy comparison. And in recognition of the first large scale participation of women in the war, the volume thoroughly documents their individual and unit contributions to the Allied effort. Finally, the encyclopedia discusses battlefield realities that explain, for example, why the airborne drops at Normandy succeeded and the ones at Arnhem failed. A bibliography, glossary, maps, photographs, and weapons and data tables enhance the coverage. Also includes 16 maps.

Bulletin of the Atomic Scientists, 1965-12 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. The Value of History Paul F. Frank Beisbier, 2019-07-09 The work that is about to be surveyed by the reader represents decades of painstaking work to provide him or her with the most positive and freshest perspective with respect to what the discipline of history teaches him or her to improve the quality of not only his or her daily life but also those of all other whom he or she comes into contact with. This task is accomplished when he or she becomes aware of the fact that the greatest possible good can only be achieved through the promotion of the adequate satisfaction of the greatest number of needs of the maximum number of people within the context of its being mutually beneficial to all parties involved. Furthermore, the reader of this volume gains the widest perspective on how the above assertion is valid for and has a positive impact on all fields of human endeavor, individual human lives, and human institutions, since the content of historical subject matter consists of nothing less than the past and present record of all the events and developments of the above entities. Thus, since everything that people learn is through past and present

experiences history teaches them everything and nothing can be perceived outside the framework of its subject matter To present a graphic example to the reader of this volume to clearly illustrate the truth and validity of the above points the author has used the comparison and contrast of the values beliefs and cultures of two very different societies in variant times and places to do so The retrograde valuing of power and wealth placed on them by a small elite in European medieval society resulting in limited social mobility in a primarily agrarian society is in marked contrast to the emphasis on limited individual freedom within the framework of the rule of law as espoused by modern America Within the latter framework it was possible to develop a modern industrial and postindustrial community to provide individual social advancement through educational and employment opportunities as well as through the availability of quality health care Finally through all that has been stated above it is worthwhile for society at large as well as the academic community to peruse through the contents of this volume in order to accomplish the above objectives Infantry ,2011 Army, Navy, Air Force Journal & Register ,1942

Infantry Journal ,1947 *Congressional Record* United States.
