**The Inner Science of Buddhist Practice** Artemus B. Engle, 2009-09-16 The Inner Science of Buddhist Practice contains translations of texts by two historically important Indian Buddhist scholars Vasubhandhu's Summary of the Five Heaps and Sthiramati's commentary on Vasubandhu's root text These works present the traditional Buddhist analysis of ordinary experience and provide rich resources for studying Buddhist and Western interpretations of the psychology of spiritual development According to Buddhist doctrine the mind of an ordinary person even at birth holds deeply ingrained predispositions that lead us to perceive the elements of everyday experience mistakenly and to believe for instance that entities persist through time that the pleasures we pursue are genuinely satisfying that our own personal being is governed by a real self and that all physical and mental phenomena have a distinct independent and real essence Our everyday language only serves to reinforce and deepen these erring notions Buddhist teaching reveals how to reject these flawed beliefs and replace them with a model that both more accurately represents our experience and is indispensable to the realizations that will free us from cyclic existence The ability to accomplish this rests largely with learning the unique vocabulary and explanations found in Buddhist literature since that is how we will discover what is mistaken about our untutored beliefs and where we will gain the intellectual skills that are needed to construct a new and more refined conceptual infrastructure Engle's introduction explores how the material contained in the two translations can specifically improve practice of the Tibetan teaching system known as Lamrim or Stages of the Path Each of the levels of motivation described by the Lamrim teachings is examined in light of the doctrine of the five heaps form feeling conception formations and consciousness to show how greater understanding of the classical Buddhist doctrines can enhance practice of that portion of the instruction

Other Lives Sonam Kachru, 2021-08-10 Human experience is not confined to waking life Do experiences in dreams matter Humans are not the only living beings who have experiences Does nonhuman experience matter The Buddhist philosopher Vasubandhu writing during the late fourth and early fifth centuries C E argues in his work The Twenty Verses that these alternative contexts ought to inform our understanding of mind and world Vasubandhu invites readers to explore experiences in dreams and to inhabit the experiences of nonhuman beings animals hungry ghosts and beings in hell Other

Lives offers a deep engagement with Vasubandhu's account of mind in a global philosophical perspective. Sonam Kachru takes up Vasubandhu's challenge to think with perspective diversifying contexts showing how his novel theory draws together action and perception, minds and worlds. Kachru pieces together the conceptual system in which Vasubandhu thought to show the deep originality of the argument. He reconstructs Vasubandhu's ecological concept of mind in which mindedness is meaningful only in a nexus with life and world to explore its ongoing philosophical significance. Engaging with a vast range of classical, modern and contemporary Asian and Western thought, *Other Lives* is both a groundbreaking work in Buddhist studies and a model of truly global philosophy. The book also includes an accessible new translation of *The Twenty Verses* providing a fresh introduction to one of the most influential works of Buddhist thought.
