1. Write down the reason for the low temperature in India in the months of December and January.

Answer: Reason for the low temperature in India in month of December and January:

- Geographically, India is located in the 'Northern Hemisphere'.
- So, during the final days of December, the sun is situated vertically over the Tropic of Capricorn on the Southern Hemisphere and the rays of the sun are not that strongly directed over India which lies in the Northern Hemisphere.

- This is the reason India experiences lower temperatures during December and January.
- Also, the north of India lays the Himalayas. During winter, the cold airflow from the Himalayas moves towards the south of the Indian Subcontinent resulting in colder temperature.
