A Combination of Geometry Theorem Proving and Nonstandard Analysis with Application to Newton's Principia Jacques Fleuriot, 2012-09-30 Sir Isaac Newton's *philosophi Naturalis Principia Mathematica*, the *Principia*, contains a prose-style mixture of geometric and limit reasoning that has often been viewed as logically vague. In *A Combination of Geometry Theorem Proving and Nonstandard Analysis*, Jacques Fleuriot presents a formalization of lemmas and propositions from the *Principia* using a combination of methods from geometry and nonstandard analysis. The mechanization of the procedures, which respects much of Newton's original reasoning, is developed within the theorem prover Isabelle. The application of this framework to the mechanization of elementary real analysis using nonstandard techniques is also discussed.
