Criminal Justice and Privatisation Philip Bean,2020-06-07 Over the past few years opposition to the privatisation in public services in the United Kingdom and elsewhere has grown especially in areas related to criminal justice Privatisation has existed within the British criminal justice system at least since the early 1990s but the privatisation of the Probation Service in 2014 was a significant landmark in this process and signalled a larger programme of privatisation to come Criminal Justice and Privatisation works to examine the impact of privatisation on the criminal justice system and to explore the potential effects of privatising other areas including the police and the security industry By including chapters from practitioners and academics alike the book offers an expansive overview of the criminal justice system as well as observations of the effect of privatisation at ground level By also exploring the way the private companies are paid how they operate and what private companies do this book offers an insight into and the future of privatisation within the public sector

Written in a clear and direct style this book will appeal to students and scholars in criminology sociology cultural studies social theory and those interested in learning about the effects of privatisation **Federal Register** ,2013-05 HC 341 - House of Commons Commission - Thirty-seventh Report of the Commission and Annual report of the Audit Committee Great Britain. Parliament. House of Commons Commission,2015 *Holding Government to Account* Henry C Midgley,Laurence Ferry,Aileen D Murphie,2024-12-03 The National Audit Office has played an important role in the checks and balances of the UK parliamentary and political system over the last 40 years This new book more than just a history of the UK s supreme audit institution examines the very definition of accountability through both an historic and an academic lens critically exploring questions about the role of audit in a democracy and how well it is working *Holding Government to Account* draws on several unique sources of evidence including interviews with senior officials from the National Audit Office and the civil service as well as senior parliamentarians with experience of the NAO s relationships with government and legislature These interviews are supplemented by an analysis of previously unpublished manuscript material in the National Archives examination of NAO reports and parliamentary and other reports focused on accountability The book begins with a history of the National Audit Office in the context of the UK s wider history It then offers an overview of the constitutional political and human legacies of the Exchequer and Audit Department followed by a close examination of the National Audit Office s leadership and decision making from inception in 1984 through to the present The authors conclude with an exploration of the way in which the meaning of public sector audit has evolved over time in accordance with its wider political ideological and material context In doing so they demonstrate that any question about the National Audit Office s future and organisation is really a question about what democracy and good government mean in a modern bureaucratic state *Holding Government to Account* will be of keen interest to students enrolled in courses on accounting public administration law and politics as well as to politicians civil servants and Supreme Audit Institutions internationally *The Human Rights Covenants at 50* Daniel Moeckli,Helen Keller,Corina Heri,2018-06-06 Half a century ago on 16 December 1966 the UN General Assembly adopted the International Covenant on Civil and Political Rights ICCPR and the International Covenant on Economic Social and Cultural Rights ICESCR While the adoption of the two UN human rights covenants was celebrated all over the world their 50th anniversary has received very little attention from the international community The present book marks this anniversary by taking stock of the first half century of the existence of what are probably the world s two most important human rights treaties It does so by reflecting on what the covenants have achieved or failed to achieve in the years that have passed by determining and comparing their current influence in the various regions of the world and by assessing their potential roles in the future The book contains papers that were presented during a symposium held in Zurich in 2016 which brought together experts and stakeholders from a range of disciplines and world regions Some fundamental issues that are addressed by the contributors are as old as the two covenants themselves They concern for example the division of

human rights into first and second generation rights and the question of whether there should be one central monitoring body possibly a world court or more than just one However the contributors go beyond such questions that have been explored before they develop new answers to old questions and point to new challenges

Globalization and Animal Law

Thomas G. Kelch, 2017-05-01 The rise of the globalized economy has rendered an even more profound change in the relationship between humans and other animals than the ancient progression from huntergatherer to agricultural society In today s global markets multinational corporations exploit the economic value of animals throughout the world on an unprecedented scale The philosophical and legal notions that animals are mere unfeeling machines or pieces of property although more or less taken for granted for centuries has been challenged if not burst asunder in recent decades in law moral philosophy and cognitive and other sciences and regulation of the treatment of animals in agriculture experimentation entertainment and other areas has begun to make substantial inroads in national and international law This book provides a detailed analysis of international and comparative animal law focusing on the impact of today s globalized economy on animal law Describing a wide range of domestic and international laws relating to the treatment of animals the author explicates the sorts of legal rules which affect the global animal marketplace Representative norms in existing animal protection laws are analyzed and critiqued illustrating the diverse approaches taken by different countries and by the international community in regulating uses of animals Among the issues covered are the following contemporary philosophical thought on the relationship between humans and animals recent scientific research relating to cognitive and other abilities of animals legal issues relating to factory farming and animal slaughter legal protection of animals during transport regulatory schemes on animal experimentation laws on the use of animals in entertainment laws on protection of companion animals regulation of trade in endangered species international trade issues relating to animals including consideration of the provisions of GATT and the seminal WTO GATT decisions in the Tuna Dolphin Shrimp Turtle Tuna Labeling and EU Seal Products cases constitutional protection for the interests of animals intellectual property law issues relating to animals efforts to have the legal personhood of certain animals judicially recognized and what the future may hold for animal law in the global economy To ensure the consideration of a full range of legal approaches the laws analyzed come from a wide variety of countries and jurisdictions including Australia Austria Brazil Canada the EU Germany India Ireland New Zealand Switzerland the UK and state and federal laws of the US Numerous international treaties and conventions relevant to animal treatment and animal law are also covered including the Berne Convention for the Protection of Literary and Artistic Works the CITES Convention the European Convention for the Protection of Animals Kept for Farming Purposes the European Patent Convention the GATT Treaty the TRIPS Agreement and the Universal Copyright Convention It is not difficult to grasp given the continuing increases in production consumption and use of animals and animal products worldwide that legal initiatives in this often emotional and acrimonious area of law are frequently contentious and hard fought But this is really just the dawn of animal

law which has only recently become recognized as an important cutting edge topic and this area of the law promises to develop rapidly in the future This book is enormously valuable in contributing to the continuing development and understanding of this law clearly laying out the contours and boundaries of existing animal laws in our global economy and allowing legal educators concerned lawyers and policymakers to teach formulate proposals argue cases and defenses and secure a firm purchase on future trends and developments in animal law *Lawyers and Mediators* Mavis Maclean, John Eekelaar, 2016-02-25 Do lawyers make matters worse or do they provide information advice and support which can help to prevent disputes arising or manage them when they do Do mediators enable parties to communicate and reach agreements tailor made to their needs Or working outside the legal framework do they find it difficult to protect weaker parties and access expert advice What happens when lawyers become mediators This book will describe the structure of service provision and the day to day work of lawyers mediators and lawyer mediators drawing on empirical work carried out between 2013 and 2015 immediately after the recent changes to the management of divorce and separation within the family justice system The reduction in legal aided help in 2013 and the failure of mediation to fill the gap in 2014 15 have given rise to a difficult debate This book aims to provide an account of some of the practical effects of these policies through a description of the daily work of practitioners in the sector It raises the question of whether we need to choose between traditional legal services and the new processes of private ordering or whether intermediate positions might be possible *Towards Green Marine Technology and Transport* Carlos Guedes Soares, Roko Dejhalla, Dusko Pavletic, 2015-09-04 *Towards Green Marine Technology and Transport* covers recent developments in marine technology and transport The book brings together a selection of papers reflecting fundamental areas of recent research and development in the fields of ship hydrodynamics marine structures ship design shipyard technology ship machinery maritime transportation The EU Common Consolidated Corporate Tax Base Dennis Weber, Jan van de Streek, 2016-04-24 In October 2016 the European Commission relaunched its plan to harmonize national income tax systems via the Common Consolidated Corporate Tax Base CCCTB perhaps the most ambitious reform of EU tax law ever attempted This timely book offers an early analysis of this important proposal and its implications covering issues such as the project s scope and main elements international considerations the relationship with OECD s base erosion and profit shifting BEPS initiative consolidation and anti abuse rules With carefully selected papers first presented at a January 2017 conference hosted by the Amsterdam Centre for Tax Law this volume focuses on such topics and issues as the following ways in which the proposed CCCTB is designed to preserve the competence of Member States to set their own tax rates reduction of the administrative burden for multinational companies incentives for research and development automatic cross border relief within the EU detailed analysis of the proposal s formula apportionment regime proposed new controlled foreign company CFC rules and interest limitation rule Because of the commitment of many Member States to keep their corporate income tax systems competitive on a stand alone basis the

proposed CCCTB is enormously controversial This book provides authoritative insights into problems likely to arise and discusses the prospects of how the proposal is likely to be implemented Thus this book proves to be of immeasurable value to taxation policymakers practitioners and academics Social Experiments in Practice: The What, Why, When, Where, and How of Experimental Design and Analysis Laura R. Peck, 2017-01-10 This issue considers social experiments in practice and how recent advances improve their value and potential applications Although controversial it is clear they are here to stay and are in fact increasing With their greater abundance experimental evaluations have stretched to address more diverse policy questions no longer simply providing a treatment control contrast but adding multiarm multistage and multidimensional factorial designs and analytic extensions to expose more about what works best for whom Social experiments are also putting programs under the microscope when they are most ready for testing enhancing the policy value of their findings This volume provides new developments in all these areas from scholars instrumental to recent scientific advances In some instances established ideas are given new attention connecting them to new opportunities to learn and inform policy By all means this issue aims to encourage stronger and more informative social experiments in the future This is the 152nd issue in the New Directions for Evaluation series from Jossey Bass It is an official publication of the American Evaluation Association *Valuing U.S. National Parks and Programs* Linda J. Bilmes, John B. Loomis, 2019-07-12 This book provides the first comprehensive economic valuation of U S National Parks including monuments seashores lakeshores recreation areas and historic sites and National Park Service NPS programs The book develops a comprehensive framework to calculate the economic value of protected areas with particular application to the U S National Park Service The framework covers many benefits provided by NPS units and programs including on site visitation carbon sequestration and intellectual property such as in education curricula and filming of movies TV shows with case studies of each included Examples are drawn from studies in Santa Monica Mountains National Recreation Area Golden Gate National Recreation Area Everglades National Park and Chesapeake Bay The editors conclude with a chapter on innovative approaches for sustainable funding of the NPS in its second century The framework serves as a blueprint of methodologies for conservationists government agencies land trusts economists and others to value public lands historical sites and related programs such as education The methodologies are relevant to local and state parks wildlife refuges and protected areas in developed and developing countries as well as to national parks around the world Containing a series of unique case studies this book will be of great interest to professionals and students in environmental economics land management and nature conservation as well as the more general reader interested in National Parks **Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)** Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events Ireland and the Magdalene Laundries Claire McGettrick, Katherine O'Donnell, Maeve O'Rourke, James M. Smith, Mari Steed, 2021-08-12

Between 1922 and 1996 over 10 000 girls and women were imprisoned in Magdalene Laundries including those considered promiscuous a burden to their families or the state those who had been sexually abused or raised in the care of the Church and State and unmarried mothers These girls and women were subjected to forced labour as well as psychological and physical maltreatment Using the Irish State s own report into the Magdalene institutions as well as testimonies from survivors and independent witnesses this book gives a detailed account of life behind the high walls of Ireland s Magdalene institutions The book offers an overview of the social cultural and political contexts of institutional survivor activism the Irish State s response culminating in the McAleese Report and the formation of the Justice for Magdalenes campaign a volunteer run survivor advocacy group Ireland and the Magdalene Laundries documents the ongoing work carried out by the Justice for Magdalenes group in advancing public knowledge and research into Magdalene Laundries and how the Irish State continues to evade its responsibilities not just to survivors of the Magdalenes but also in providing a truthful account of what happened Drawing from a variety of primary sources this book reveals the fundamental flaws in the state s investigation and how the treatment of the burials exhumation and cremation of former Magdalene women remains a deeply troubling issue today emblematic of the system of torture and studious official neglect in which the Magdalene women lived their lives The Authors are donating all royalties in the name of the women who were held in the Magdalenes to EPIC Empowering People in Care

The Use of CITES for Commercially-exploited Fish Species Solène Guggisberg,2015-12-11 This book examines the legality adequacy and efficacy of using the Convention on International Trade in Endangered Species of Wild Fauna and Flora CITES for commercially exploited fish species and assesses whether the existing institutional cooperation with the Food and Agriculture Organization FAO and regional fisheries management organizations RFMOs is efficient This case study also provides an interesting lens to approaching wider international law issues Indeed finding ways to achieve effective governance of transboundary or global natural resources is central to the peaceful use of oceans and land Furthermore the role of science in advising decision makers is a sensitive issue which deserves scrutiny and is similar in many regimes Finally the complex problem of fragmentation of international law is acute in various fields of environmental law as in all rapidly developing areas of international regulations

The Exceptional Potential of General Practice Graham Watt,2018-12-07 This innovative and timely book draws on pioneering precedents basic principles current examples and international experience to capture the narratives examples and ideas that underlie and demonstrate the exceptional potential of general practice If health care is not at its best where it is needed most health inequalities will widen

The unworried unwell are not hard to reach but they are easy to ignore and are often ignored. With patient contact, population coverage, continuity, coordination, flexibility, long term relationships, and trust, general practices are the natural hubs of local health systems. Practitioners are not only scientists but also responsible citizens, and if they did not raise their voice, who else should? Written for family doctors looking to strengthen local collaboration, it brings together the traditional strengths of consultations, caring, continuity, coordination, and coverage with the current and future challenges of building capacity, community, creativity, consistency, collegiality, and campaigning. It highlights the critical importance of working with patients, maximising the use of serial encounters, integrating care, joint working between practices, social prescribing, community development, and advocacy based on patient and practitioner experience. Drawing on the highly regarded work of Deep End GPs serving the poorest communities in Scotland (www.gla.ac.uk/deepend), the book is an invaluable handbook for all primary care doctors, irrespective of health care system or country, seeking to provide unconditional continuity of personalised care for all patients, whatever problem or combination of problems a patient may have.
