St Math Challenge Cheats:

Guiding Students from Cheating and Plagiarism to Honesty and Integrity Ann Lathrop, Kathleen Foss, 2005-10-30 In the past it was the struggling student who was more likely to cheat just to get by Today above average college bound students are just as likely to do so This sequel to the eye opening *Student Cheating and Plagiarism in the Internet Era A Wake Up Call* 2000 is a call to arms for students teachers administrators librarians and parents to transpose school culture from one that ignores or tolerates cheating into one where every effort is made to value encourage and support honesty First person accounts lend credence to a cornucopia of practical ideas and actions No home school or library should be without at least one copy Cheating continues to be a national epidemic Here Lathrop and Foss have produced a sequel to their 2000 eye opener *Student Cheating and Plagiarism in the Internet Era A Wake Up Call* But where the first volume focused on honor codes and careful monitoring of student tests and written assignments their latest work is a call to arms students teachers administrators librarians and parents must make a concerted effort to change school culture from one that ignores or tolerates cheating into one where every effort is made to value encourage and support honesty Each chapter offers quick and easy access to practical ideas and actions that can be taken off the page and into the classroom or home situation Among these first person accounts dominate with such compelling themes as Why I Didn't Cheat Policies That Support Honest Students and Student Whistleblowers It is a myth that the struggling students are the ones who are more likely to cheat just to get by The above average college bound students are just as likely to do so as they compete for scholarships and college admission No home school or library should be without at least one copy of this book

Resources in Education, 1998 **Norms of Word Association** Leo Postman, Geoffrey Keppel, 2014-05-10 Norms of Word Association contains a heterogeneous collection of word association norms This book brings together nine sets of association norms that were collected independently at different times during a 15 year period Each chapter is a self contained unit The order in which the norms are presented is arbitrary although an attempt is made to group together norms that seem to belong together The 1952 Minnesota norms are presented first due to age and in recognition of the fact that a number of the norms that follow are direct outgrowths of this work The next three norms in this collection are responses to the Russell Jenkins stimuli obtained from subjects representing different linguistic communities A summary of association norms collected from British and Australian subjects are reported along with association norms from German and French college students and French workmen Four sets of norms that are not directly related to the 1952 Minnesota collection are included The text will be of interest to historians and researchers in the field of verbal learning and verbal behavior
