

The Great Debaters Question Guide

Scene # 1-My Soul Is a Witness

Listen to and discuss the opening prayer and speech by Dr. Farmer. Explain the significance of the powerful words which are spoken in the background as the viewer watches several different scenes:

- Samantha Booze takes the bus to school and is watching her impoverished community in the window as she passes
- Melvin Tolson dressed as farmer walking into the night
- Henry Lowe in bar about to get in a fight

"When I was a child I spoke as a child, I understood as a child, I thought as a child but when I became a man, I put away all childish things. Freshman class...I believe we are the most privileged people in America, because we have the most important job in America, the education of our young people...We must impress upon our young people that there will difficulties that they will face, they must defeat them, they must do what they have to do in order to do what they want to do. Education is the only way out, the way out of ignorance, the way out of darkness, into the glorious light."

Dr. James Farmer

1. What does Dr. Farmer mean when he said "When I was a child I spoke as a child...but when I became a man I put away all childish things"?
2. Is it the school's role to help youth to develop into adults? Why or Why not?
3. Where do most of our young people learn the lessons they need to become adults today?
4. What do you think Samantha Booze is thinking as she looks out the window at her impoverished community?
5. What does Dr. Farmer mean when he says "they must do what they have to do in order to do what they want to do"? How can you apply this to your own life?
6. What would have happened if Henry Lowe had actually stabbed the women's husband in the fight in the bar?
7. Is education still the "way out of darkness and into the glorious light" for the African American community? If so, how?

advancement in digitalization robotization and artificial intelligence while mitigating the negative consequences in terms of job losses cybercrime and social and political polarization From the vantage point of experts from economics law and political science this book provides insights into the role that the EU is and ought to be playing in regulating global platform companies addressing taxation in the digital economy mitigating job displacements on the labour market and tackling ethical concerns of artificial intelligence and the prospect of digital democracy All chapters are based on up to date research findings succinct assessment of the current state of affairs and ongoing debates They conclude with policy recommendations for policy makers on European and national levels This volume has a solid foundation in the highly topical question of technological change More importantly the individual chapters are written by qualified scholars whose analytically advanced contributions are likely to interest a wide audience I can strongly recommend this book for scholars and students in political science law and economics Carl Fredrik Bergström Professor of European Law Uppsala University Sweden When the Commission took office in 2019 it put forward its vision as to how Europe's digital future could be shaped in a way that makes the digital transition enrich people's lives and make sure that European businesses fully benefit from the opportunities offered by digital technologies Then COVID drastically accelerated the take up of digital solutions As the digital transformation affects every single one of us it is important that we have the widest possible debate on its inherent risks and opportunities This is why I warmly recommend this book It brings together an interdisciplinary set of scholars able to analyse the multifaceted implications of the technological shift And I could not agree more with the book's main takeaway i.e. that we need to create an adaptive regulatory framework capable of harnessing the positive effects of technological changes while buttressing the negative impact on European society and citizens Ambassador Kim Jørgensen Head of Cabinet to Commissioner and Executive Vice President Margrethe Vestager European Commission **Elle**, 2008 Workbook and Study Outline for Problems of American Democracy Raymond Robert Ammarell, 1928 **The Golden Talking-Shop** Edward Pearce, 2016-10-19 In the late 1890s Britain was basking in the high noon of empire albeit with the sobering experience of the Boer War just around the corner By 1956 the year of the Suez debacle and less than a lifetime later the age of empire was drawing rapidly to a close and Britain's position as an independent great power was over In between the country had experienced two devastating world wars India the jewel in her imperial crown had gained independence And there had been far reaching changes on the domestic front the birth of the welfare state full men's and eventually women's suffrage and the foundation of the National Health Service to name but a few Throughout this momentous period the Oxford Union the world's most famous debating society continued to meet to debate and discuss the changing world around them Sometimes their debates had important repercussions in the wider world such as the notorious King and Country debate of 1933 which made headlines around the globe and which Winston Churchill described as that abject squalid shameless avowal More often than not the debates had merely a local impact even if among the debaters were many of the leaders thinkers and opinion formers
