Unsustainability*

The Gulf Monarchies And Climate Change

Mohamed Abdel Raouf, Mari Luomi

The Gulf Monarchies And Climate Change:

The Gulf Monarchies and Climate Change Mari Luomi, 2015-03-15 At the heart of Mari Luomi's salutary book is whether oil and gas dependent authoritarian monarchies can keep their natural resource use and the environment in balance. She argues that the Gulf monarchies have already reached their limits of natural sustainability given that several of them are dependent on natural gas imports. Water resources are dwindling and food import dependence is high and rising. Qatar's per capita emission of CO₂ is ten times the global average. As a result of their booming economies, the Gulf monarchies' surging electricity and water demand have exerted unexpected pressures on domestic energy supply. Simultaneously, the consolidation of climate change on the international agenda has created a new uncertainty for local rulers whose survival depends on sales of oil and gas. Meanwhile, domestic resource consumption together with climate change are putting unprecedented stress on the region's fragile desert environment. The Gulf is under stress, but so too are its states' power, wealth, and ecosystems. Luomi reveals how Abu Dhabi and Qatar have responded to these new natural resource related pressures, particularly climate change, and how their responses are inextricably linked with elite legitimacy strategies and the natural unsustainability of their political economies.

Climate Change Law and Policy in the Middle East and North Africa Region Damilola S. Olawuyi, 2021-07-28 Climate Change Law and Policy in the Middle East and North Africa Region provides an in-depth and authoritative examination of the guiding principles of climate change law and policy in the MENA region. This volume introduces readers to the latest developments in the regulation of climate change across the region, including the applicable legislation, institutions, and key legal innovations in climate change financing, infrastructure development, and education. It outlines participatory and bottom-up legal strategies focusing on transparency, accountability, gender justice, and other human rights safeguards needed to achieve greater coherence and coordination in the design, approval, financing, and implementation of climate response projects across the region. With contributions from a range of experts in the field, the collection reflects on how MENA countries can advance existing national strategies around climate change, green economy, and low carbon futures through clear and comprehensive legislation. Taking an international and comparative approach, this book will be of great interest to students, scholars, and practitioners who work in the areas of climate change, environmental law and policy, and sustainable development, particularly in relation to the MENA region.

Political Power and Environmental Sustainability in Gulf Monarchies Tobias Zumbraegel, 2022-09-23 This book offers a new perspective about the Gulf Arab states entering a post-oil era by looking at the political factors behind the green transformation. It discusses the recent environmental enthusiasm in the oil and gas-rich Gulf monarchies by asking how political power can be constituted through advocating environmental sustainability. While hydrocarbon-wealthy Gulf monarchies have been viewed as the globe's hydrocarbon powerhouse with an immense ecological footprint, efforts towards sustainability and environmental protection measures are increasingly monitored. Climate Change environmental degradation

and the global pressure towards a low carbon development are threatening the very basis of economic and political power of the oil and gas exporting Gulf monarchies So far discussions about this fundamental transformation have barely elaborated how it affects and reorganizes political power games in the region This book attempts to overcome the dominant focus of techno economic drivers of change and uncovers how environmental sustainability impacts state society and state elite relationships as well as shaping regional and even global geopolitics *The Future of the Gulf Region* Arno

Tausch,2021-08-09 This book studies values and attitudes in the Gulf region In light of global power shifts the threatening collapse of internal security in the West and uncertainty about the current leadership vacuum in world society this book explores a future leading role of the Gulf countries in such institutions as the G 20 and the OECD Based on rigorous analysis of macro level data and opinion surveys with relevance for the Gulf region it analyzes the global macro factors shaping the Gulf s future at a time of the global COVID 19 crisis and depression and rising global tensions Starting with an empirical time series analysis of the long cycles of global politics and economics it highlights the implications for the Gulf region Offering a multivariate analysis of civil society values in the Gulf the author analyzes value changes and attitudes on antisemitism political Islam internal security democracy and other issues of Arab politics The partially optimistic conclusions of the study testify to the underestimated and incipient maturity of the Gulf s civil society and strongly suggest that the Gulf s future is rather with the free societies of the West and not with a Neo Ottoman Empire in whatever form Exceptional in scope and right up to the minute in coverage Brian M Pollins Associate Professor Emeritus The Ohio State University An outstanding and topical book by an astute scholar of the MENA region Professor Hussein Solomon Academic Head of Department Political Studies and Governance University of the Free State South Africa The most comprehensive and insightful study on the subject to date Manfred B Steger Professor of Sociology University of Hawai i at Manoa and Global Professorial Fellow Western Sydney University **The Green Economy in the Gulf** Mohamed Abdel Raouf,Mari Luomi,2015-07-30 Filling a

void in academic and policy relevant literature on the topic of the green economy in the Arabian Gulf this edited volume provides a multidisciplinary analysis of the key themes and challenges relating to the green economy in the region including in the energy and water sectors and the urban environment as well as with respect to cross cutting issues such as labour intellectual property and South South cooperation Over the course of the book academics and practitioners from various fields demonstrate why transitioning into a green economy a future economy based on environmental sustainability social equity and improved well being is not an option but a necessity for the Gulf Cooperation Council GCC States Through chapters covering key economic sectors and cross cutting issues the book examines the GCC states quest to align their economies and economic development with the imperatives of environmental sustainability and social welfare and proposes a way forward based on lessons learned from experiences in the region and beyond This volume will be of great relevance to scholars and policy makers with an interest in environmental economics and policy **The Gulf States in International**

Political Economy Kristian Coates Ulrichsen, 2016-05-02 Kristian Coates Ulrichsen documents the startling rise of the Arab Gulf States as regional powers with international reach and provides a definitive account of how they have become embedded in the global system of power politics and policy making *The United Arab Emirates* Kristian Coates Ulrichsen, 2016-12-01 Led by Dubai and Abu Dhabi the UAE has become deeply embedded in the contemporary system of international power politics and policy making Only an independent state since 1971 the seven emirates that constitute the UAE represent not only the most successful Arab federal experiment but also the most durable However the 2008 financial crisis and its aftermath underscored the continuing imbalance between Abu Dhabi and Dubai and the five northern emirates Meanwhile the post 2011 security crackdown revealed the acute sensitivity of officials in Abu Dhabi to social inequalities and economic disparities across the federation The United Arab Emirates Power Politics and Policymaking charts the various processes of state formation and political and economic development that have enabled the UAE to emerge as a significant regional power and major player in the post Arab Spring reordering of Middle East and North African Politics as well as the closest partner of the US in military and security affairs in the region It also explores the seamier underside of that growth in terms of the condition of migrant workers recent interventions in Libya and Yemen and latterly one of the highest rates of political prisoners per capita in the world The book concludes with a discussion of the likely policy challenges that the UAE will face in coming years especially as it moves towards its fiftieth anniversary in 2021 Providing a comprehensive and accessible assessment of the UAE this book will be a vital resource for students and scholars of International Relations and Middle East Studies as well as non specialists with an interest in the United Arab Emirates and its global position

Environmental Politics in the Middle East Harry Verhoeven, 2018 Offers a critical and realistic reassessment of the threats posed to the environment in the Middle East and what can be done about them **Atlas of the Gulf States** Philippe Cadène, Brigitte Dumortier, 2013-04-15 The Arab Gulf States possess more than half of the planet's crude oil reserves and their gas reserves are immense The transition from being rental economies to producing economies has caused rapid and significant changes including the influx of foreign Arab and Asian manual laborers and spectacular urban development particularly along the coast This Atlas of the Gulf States contains more than 150 maps and graphs based on recent data It offers a survey of the history and economic and urban development of the Gulf region For Iraq Kuwait Saudi Arabia Qatar Bahrain the United Arab Emirates Oman and Iran this atlas offers detailed maps plans and statistics for the relevant provinces as well as the most important cities This Atlas is an updated translation from the French edition 2011 with a more extensive bibliography and an index *The Arabian Seas: Biodiversity, Environmental Challenges and Conservation Measures* Laith A. Jawad, 2021-03-30 The Arabian Seas Marine Region encompasses marine areas from Djibouti to Pakistan including the northern part of Somalia the Red Sea the Arabian Persian Gulf and parts of the Arabian Sea Human pressures on the coastal and marine environments are evident throughout the region and have resulted in harmful environmental

effects Oil and domestic urban and industrial pollutants in several areas of this part of the world have caused local habitat degradation eutrophication and algal blooms Further coastal landfill dredging and sedimentation as well as nutrient and sediment runoff from phosphate mining agriculture and grazing and reduction in freshwater seepage due to groundwater extraction are all contributing to the degradation of coastal environments This book discusses aspects not covered in other books on the region which largely focus on marine biodiversity and examines several environmental challenges that are often ignored but which have a significant impact on the environment Evaluating the status quo it also recommends conservation measures and examines the abiotic factors that play a major main role in the environmental changes Lastly the book addresses the biodiversity of the area providing a general context for the conservation and management measures discussed

Global Security Watch—Saudi Arabia Matthew Gray, 2014-10-07 Examines the causes and consequences of Saudi Arabia's current security policy and the domestic regional and international challenges the country's defense program presents to the general welfare of the Middle East As possessor of a quarter of the world's oil reserves and host to two of the holiest cities in Islam Saudi Arabia is an integral part of the cultural economic and political well being of the Middle East From Persian Gulf security to Middle Eastern politics to the international energy industry events in this desert kingdom strongly impact the stability of the region This comprehensive resource analyzes contemporary Saudi Arabia its modern history the role of Islam and the nature of Saudi foreign relations and reveals how these and other factors dictate and shape the country's current security policies and priorities Middle East expert and author Mathew Gray has organized the work into six sections the first provides an historical overview of the region from the mid 1700s to the 1980s the second explores the Saudi political and security system the third discusses Saudi U S relations the fourth looks at Saudi relations with the Gulf region and the wider Middle East and the fifth considers Saudi Arabia's role in Sunni extremism and terrorism The final chapter looks at emerging security threats for Saudi Arabia The book includes an overview of future challenges and risks including climate change water shortages and problems of Saudi identity and social dispersion

Researching Biology and Evolution in the Gulf States Jörg Matthias Determann, 2015-08-25 Officials and religious scholars in the Gulf states have repeatedly banned the teaching of the theory of evolution because of its association with atheism But Jörg Matthias Determann argues here that despite official prohibition research on biological evolution has flourished due in large part to the development of academic and professional networks This book traces these networks through the history of various branches of biology including botany conservation research ornithology and palaeontology Typical of rentier societies some of the scientific networks in this region consist of vertical patron client relationships For example those in power who are interested in wildlife conservation have been known to offer patronage to biologists working on desert ecology However just as important are the horizontal links between scientists both within the Gulf region and beyond Given the strengths and importance of these two forms of professional networks Determann argues that we should look at the Arab world as an area interconnected with

global science and therefore fully integrated into the scientific and technological advances being pioneered worldwide

Governance and Domestic Policy-Making in Saudi Arabia Mark C. Thompson, Neil Quilliam, 2022-03-24 Saudi Vision 2030 and the National Transformation Plan 2020 are governmental initiatives to diversify Saudi Arabia's economy and implement nationwide social changes. Media and scholarly attention often describe the success or failure of these ambitious visions. This book shifts the focus to instead examine and evaluate the actual processes of domestic policymaking and governance that are being mapped out to achieve them. The book is unique in its breadth with case studies from across different sectors including labour markets, defence, health, youth, energy, and the environment. Each analyses the challenges that the country's leading institutions face in making, shaping, and implementing the tailored policies that are being designed to change the country's future. In doing so, they reveal the factors that either currently facilitate or constrain effective and viable domestic policymaking and governance in the Kingdom. The study offers new and ground-breaking research based on the first-hand experiences of academics, researchers, policy makers, and practitioners who have privileged access to Saudi Arabia. At a time when analysis and reportage on Saudi Arabia usually highlights the high politics of foreign policy, this book sheds light on the low politics to show the extent to which Saudi policy, society, economics, and culture is changing.

Climate Change, Human Security and Violent Conflict Jürgen Scheffran, Michael Brzoska, Hans Günter Brauch, Peter Michael Link, Janpeter Schilling, 2012-05-26 Severe droughts, damaging floods, and mass migration. Climate change is becoming a focal point for security and conflict research and a challenge for the world's governance structures. But how severe are the security risks and conflict potentials of climate change? Could global warming trigger a sequence of events leading to economic decline, social unrest, and political instability? What are the causal relationships between resource scarcity and violent conflict? This book brings together international experts to explore these questions using in-depth case studies from around the world. Furthermore, the authors discuss strategies, institutions, and cooperative approaches to stabilize the climate-society interaction.

Energy Kingdoms Jim Krane, 2019-01-08 After the discovery of oil in the 1930s, the Gulf monarchies—Saudi Arabia, Kuwait, Qatar, the United Arab Emirates, Oman, and Bahrain—went from being among the world's poorest and most isolated places to some of its most ostentatiously wealthy. To maintain support, the ruling sheikhs provide their subjects with boundless, cheap energy, unwittingly leading to some of the highest consumption rates on earth. Today, as summertime temperatures set new records, the Gulf's rulers find themselves caught in a dilemma: can they curb their profligacy without jeopardizing the survival of some of the world's last absolute monarchies? In *Energy Kingdoms*, Jim Krane takes readers inside these monarchies to consider their conundrum. He traces the history of the Gulf states' energy use and policies, looking in particular at how energy subsidies have distorted demand. Oil exports are the lifeblood of their political, economic systems and the basis of their strategic importance, but domestic consumption has begun eating into exports while climate change threatens to render their desert region uninhabitable. At risk are the sheikhdoms' way of life, their relations

with their Western protectors and their political stability in a chaotic region Backed by rich fieldwork and deep knowledge of the region Krane expertly lays out the hard choices that Gulf leaders face to keep their states viable

Environmental Law in Arab States Damilola S. Olawuyi, 2022-02-11 Environmental Law in Arab States offers a comprehensive and authoritative account of the guiding principles and rules relating to environmental protection in the Arab region Taking an international and comparative approach the book introduces readers to the latest developments of environmental law across the Arab region through applicable legislation green finance and climate technologies The impact of these is assessed in each of the major areas of environmental regulation air pollution water pollution biodiversity conservation of nature and cultural heritage infrastructure development and Islamic ecology Consideration is given to participatory and bottom up legal strategies focusing on transparency accountability gender justice and other human rights safeguards that are needed to achieve greater coherence and coordination in the implementation and enforcement of environmental regulation across the region The book closes by providing legal assessments and reflections on how Arab countries can through clear and comprehensive legislation advance existing national strategies and visions on trade and investment green growth Islamic green finance circular economy blue economy and low carbon future amongst others *Routledge Handbook on Cooperation, Interdependencies and Security in the Mediterranean* Elena Calandri, Karolina Golemo, Jesús Ventura-Fernández, 2024-11-29 This Handbook provides an essential overview of the contemporary dynamics of the Mediterranean region Conceptualising the Mediterranean as both a socio cultural area and a geopolitical entity it considers the basin both as a whole and as a set of interacting subregions Established scholars offer new perspectives and approaches from international history postcolonial studies migration studies geography private international law and public international law environmental and tourism studies to reappraise the long term trends and ruptures that shape security interdependence and cooperation These contributions explain the Mediterranean's long established role as a crossroads and demonstrate the political economic ecological and cultural meanings of security The book shows how interdependence in economic environmental cultural and human sectors continues to bind the Mediterranean together as migration flows across the sea environmental change requires common action legal systems coexist and multifaceted identities growing cultural awareness and human rights remain on the political agenda This volume will be an invaluable resource for graduate students researchers and professionals seeking a comprehensive multidisciplinary approach to the historical political geographic and socio cultural complexities challenges and potential of the area

Reimagining Climate Change Paul Wapner, Hilal Elver, 2016-02-05 Responding to climate change has become an industry Governments corporations activist groups and others now devote billions of dollars to mitigation and adaptation and their efforts represent one of the most significant policy measures ever dedicated to a global challenge Despite its laudatory intent the response industry or Climate Inc is failing Reimagining Climate Change questions established categories routines and practices that presently constitute

accepted solutions to tackling climate change and offers alternative routes forward It does so by unleashing the political imagination The chapters grasp the larger arc of collective experience interpret its meaning for the choices we face and creatively visualize alternative trajectories that can help us cognitively and emotionally enter into alternative climate futures They probe the meaning and effectiveness of climate protection from below forms of community and practice that are emerging in various locales around the world and that hold promise for greater collective resonance They also question climate protection from above in the form of industrial and modernist orientations and examine large scale agribusinesses as well as criticize the concept of resilience as it is presently being promoted as a response to climate change This book will be of great interest to students and scholars of climate change global environmental politics and environmental studies in general as well as climate change activists

The Economic and Political Aftermath of the Arab Spring Carlo Altomonte, Massimiliano Ferrara, 2014-03-28 The economies of the Middle East and North Africa MENA region have always been characterized by economic volatility and social disparities The recent Arab Spring wave of protests has increased political uncertainty and instability in the region a
