Describing Species Judith E. Winston, 1999-11-04 New species are discovered every day and cataloguing all of them has grown into a nearly insurmountable task worldwide Now this definitive reference manual acts as a style guide for writing and filing species descriptions New collecting techniques and new technology have led to a dramatic increase in the number of species that are discovered Explorations of unstudied regions and new habitats for almost any group of organisms can result in a large number of new species discoveries and hence the need to be described Yet there is no one source a student or researcher can readily consult to learn the basic

practical aspects of taxonomic procedures Species description can present a variety of difficulties Problems arise when new species are not given names because their discoverers do not know how to write a formal species description or when these species are poorly described Biologists may also have to deal with nomenclatural problems created by previous workers or resulting from new information generated by their own research This practical resource for scientists and students contains instructions and examples showing how to describe newly discovered species in both the animal and plant kingdoms With special chapters on publishing taxonomic papers and on ecology in species description as well as sections covering subspecies genus level and higher taxa descriptions Describing Species enhances any writer s taxonomic projects reports checklists floras faunal surveys revisions monographs or guides The volume is based on current versions of the International Codes of Zoological and Botanical Nomenclature and recognizes that systematics is a global and multicultural exercise Though Describing Species has been written for an English speaking audience it is useful anywhere Taxonomy is spoken and will be a valuable tool for professionals and students in zoology botany ecology paleontology and other fields of biology

Scientific Style and Format CBE Style Manual Committee,1994-11-25 A revised and expanded sixth edition of the CBE Manual for scientific authors **The Chicago Guide to Communicating Science** Scott L. Montgomery,2017-02-21 This book is a comprehensive guide to scientific communication that has been used widely in courses and workshops as well as by individual scientists and other professionals since its first publication in 2002 This revision accounts for the many ways in which the globalization of research and the changing media landscape have altered scientific communication over the past decade With an increased focus throughout on how research is communicated in industry government and non profit centers as well as in academia it now covers such topics as the opportunities and perils of online publishing the need for translation skills and the communication of scientific findings to the broader world both directly through speaking and writing and through the filter of traditional and social media It also offers advice for those whose research concerns controversial issues such as climate change and emerging viruses in which clear and accurate communication is especially critical to the scientific community and the wider world **1979-1990** Henryk Sawoniak,2012-02-14 No detailed description available for 1979 1990 *The Technical Image* Horst Bredekamp,Vera Dünkel,Birgit Schneider,2019-04-10 In science and technology the images used to depict ideas data and reactions can be as striking and explosive as the concepts and processes they embody both works of art and generative forces in their own right Drawing on a close dialogue between the histories of art science and technology The Technical Image explores these images not as mere illustrations or examples but as productive agents and distinctive multilayered elements of the process of generating knowledge Using beautifully reproduced visuals this book not only reveals how scientific images play a constructive role in shaping the findings and insights they illustrate but also however mechanical or detached from individual researchers choices their appearances may be how they come to embody the styles of a period a mindset a research collective or a device Opening with a set of key questions about artistic

representation in science technology and medicine The Technical Image then investigates historical case studies focusing on specific images such as James Watson s models of genes drawings of Darwin s finches and images of early modern musical automata These case studies in turn are used to illustrate broad themes ranging from Digital Images to Objectivity and Evidence and to define and elaborate upon fundamental terms in the field Taken as a whole this collection will provide analytical tools for the interpretation and application of scientific and technological imagery

Sense and the Senses in Early Modern Art and Cultural Practice SivToveKulbrandstad Walker,2017-07-05 Employing a wide range of approaches from various disciplines contributors to this volume explore the diverse ways in which European art and cultural practice from the fourteenth through the seventeenth centuries confronted interpreted represented and evoked the realm of the sensual Sense and the Senses in Early Modern Art and Cultural Practice investigates how the faculties of sight hearing touch taste and smell were made to perform in a range of guises in early modern cultural practice as agents of indulgence and pleasure as bearers of information on material reality as mediators between the mind and the outer world and even as intercessors between humans and the divine The volume examines not only aspects of the arts of painting and sculpture but also extends into other spheres philosophy music and poetry gardens food relics and rituals Collectively the essays gathered here form a survey of key debates and practices attached to the theme of the senses in Renaissance and Baroque art and cultural practice

Archaeological Theory Today Ian Hodder,2014-02-27 Now in a revised and updated second edition this volume provides an authoritative account of the current status of archaeological theory as presented by some of its major exponents and innovators over recent decades It summarizes the latest developments in the field and looks to its future exploring some of the cutting edge ideas at the forefront of the discipline The volume captures the diversity of contemporary archaeological theory Some authors argue for an approach close to the natural sciences others for an engagement with cultural debate about representation of the past Some minimize the relevance of culture to societal change while others see it as central some focus on the contingent and the local others on long term evolution While few practitioners in theoretical archaeology would today argue for a unified disciplinary approach the authors in this volume increasingly see links and convergences between their perspectives The volume also reflects archaeology s new openness to external influences as well as the desire to contribute to wider debates The contributors examine ways in which archaeological evidence contributes to theories of evolutionary psychology as well as to the social sciences in general where theories of social relationships agency landscape and identity are informed by the long term perspective of archaeology The new edition of Archaeological Theory Today will continue to be essential reading for students and scholars in archaeology and in the social sciences more generally

Drawing Nature Linda Miller Feltner,2024-07-02 Introduces and depicts the artistic process Pulls together drawing basics and more intermediate and advanced design skills to demonstrate how to use these in the creative process There are seven chapters that build on each other to incorporate new techniques and concepts It is designed so that the reader feels as
